How to calibrate the MHW-3BOMBER coffee scale？

1. **Short press "T" button three times, then long press.** At this point, the scale enters the first step of the calibration mode, 500g calibration.

2. Complete the first calibration step using **500g weights**. Then it will skip to the next step, 1000g calibration.

3. Complete the second calibration step using **1000g weights**. Then it will skip to the next step, 2000g calibration.

4. Complete the finally calibration step using **2000g weights**.

5. After completing the calibration of the above three weights, the word "**PASS**" will appear. That is, the calibration is complete.
