

TRIANIUM

Glass Screen Protector

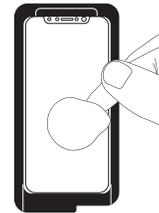

1. Use the wet wipe to remove any dirt on the screen.

2. Use the dry wipe to ensure all dust and liquid have been removed.

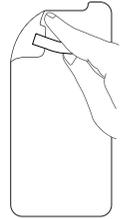

3. Place the screen protector guidance frame on top of the phone and mount it on the phone snugly according to the imprinted text on the frame.

4. Dab the sticker side of the dust-absorber to eliminate any amounts of debris on the screen.

5. Remove the bottom protective layer by pulling away the top rectangular tab.

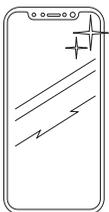

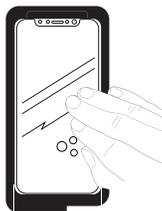

6. Without touching the sticky side of the protector, gently tap the top of the protector to the top side of the frame making sure the protector falls exactly between the frame.

7. Slowly drop the screen protector onto the screen. Always make sure the top edge of the screen protector is adjacent to the top side of the assistive frame.

8. Tap the center of the screen protector. The protector will start to adhere to the screen. If there are any bubbles, use your finger to press down and drive the bubbles out towards the closest edge.

9. Your phone is now protected!

Attention!
"White Halo Effect"

One in 10,000 iPhones may have slightly bumped screen than others. It will lead to an un-sticky edge of the screen protector, we call it the "White Halo Effect". If you are one of those unique iPhone owners, you are covered:

1. Leave the current screen protector on your phone for a temporary solution.
2. Contact trianium2014@gmail.com with a picture of the "White Halo Effect".
3. We will provide you a new version of the screen protector to fit your phone.
