

Step 1

Just pull the sticker tab and your Logitech Pebble M350 will automatically turn on. As it's ready to be connected, the status light flashes green and blue.

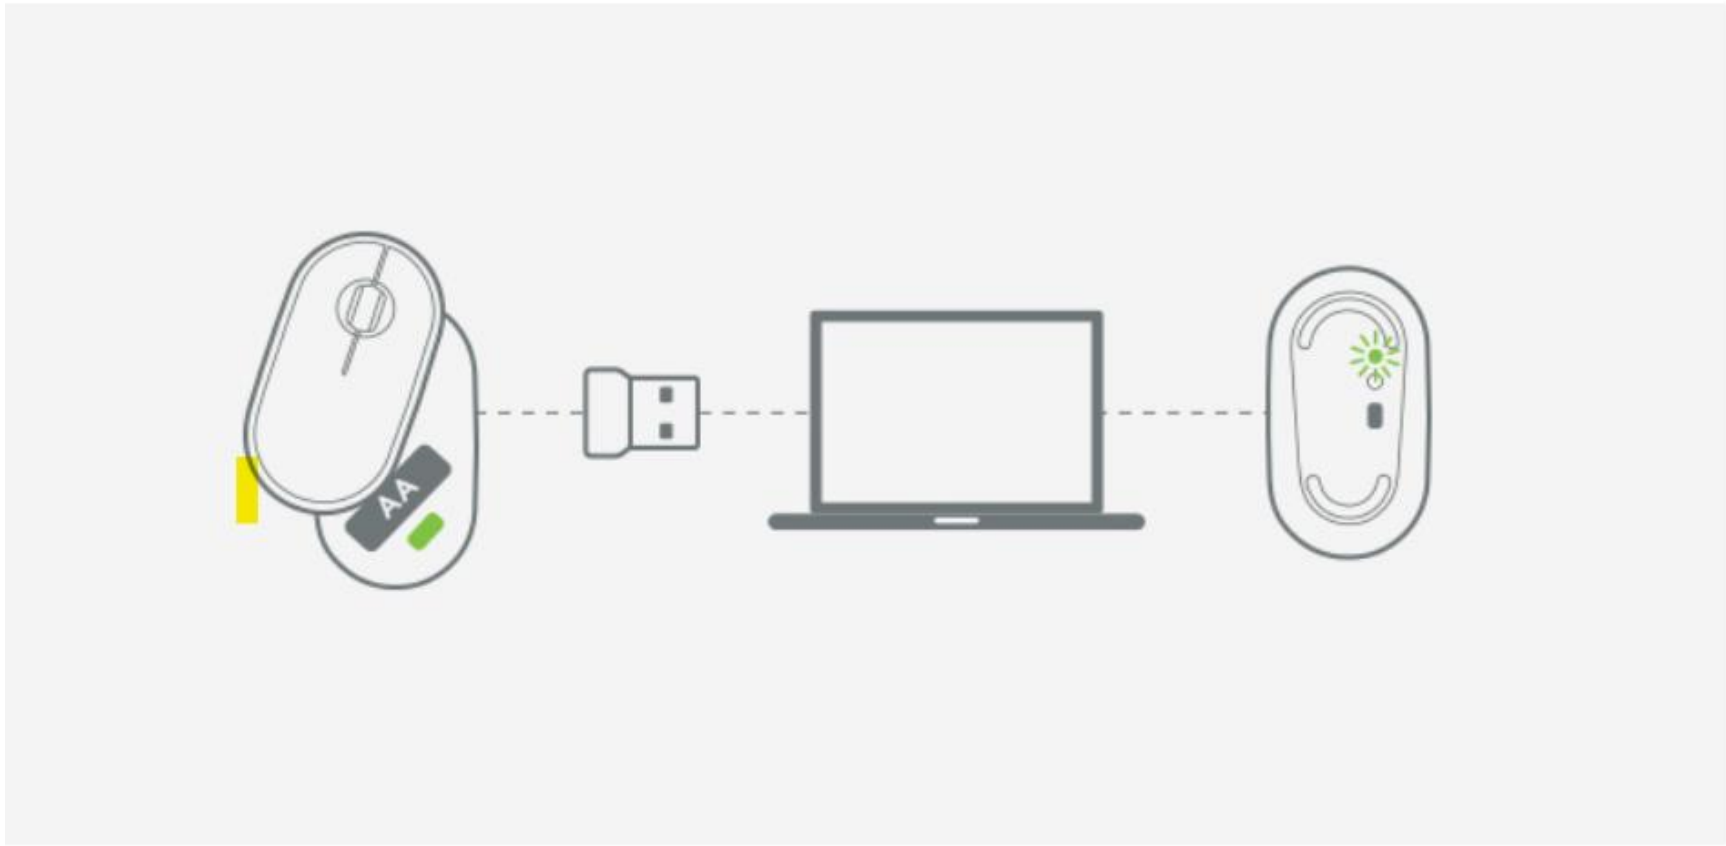

Step 2

Easily connect via *Bluetooth* by turning on your computer's *Bluetooth* connection and searching for your Logitech Pebble M350. Select and ta-da -you're paired.

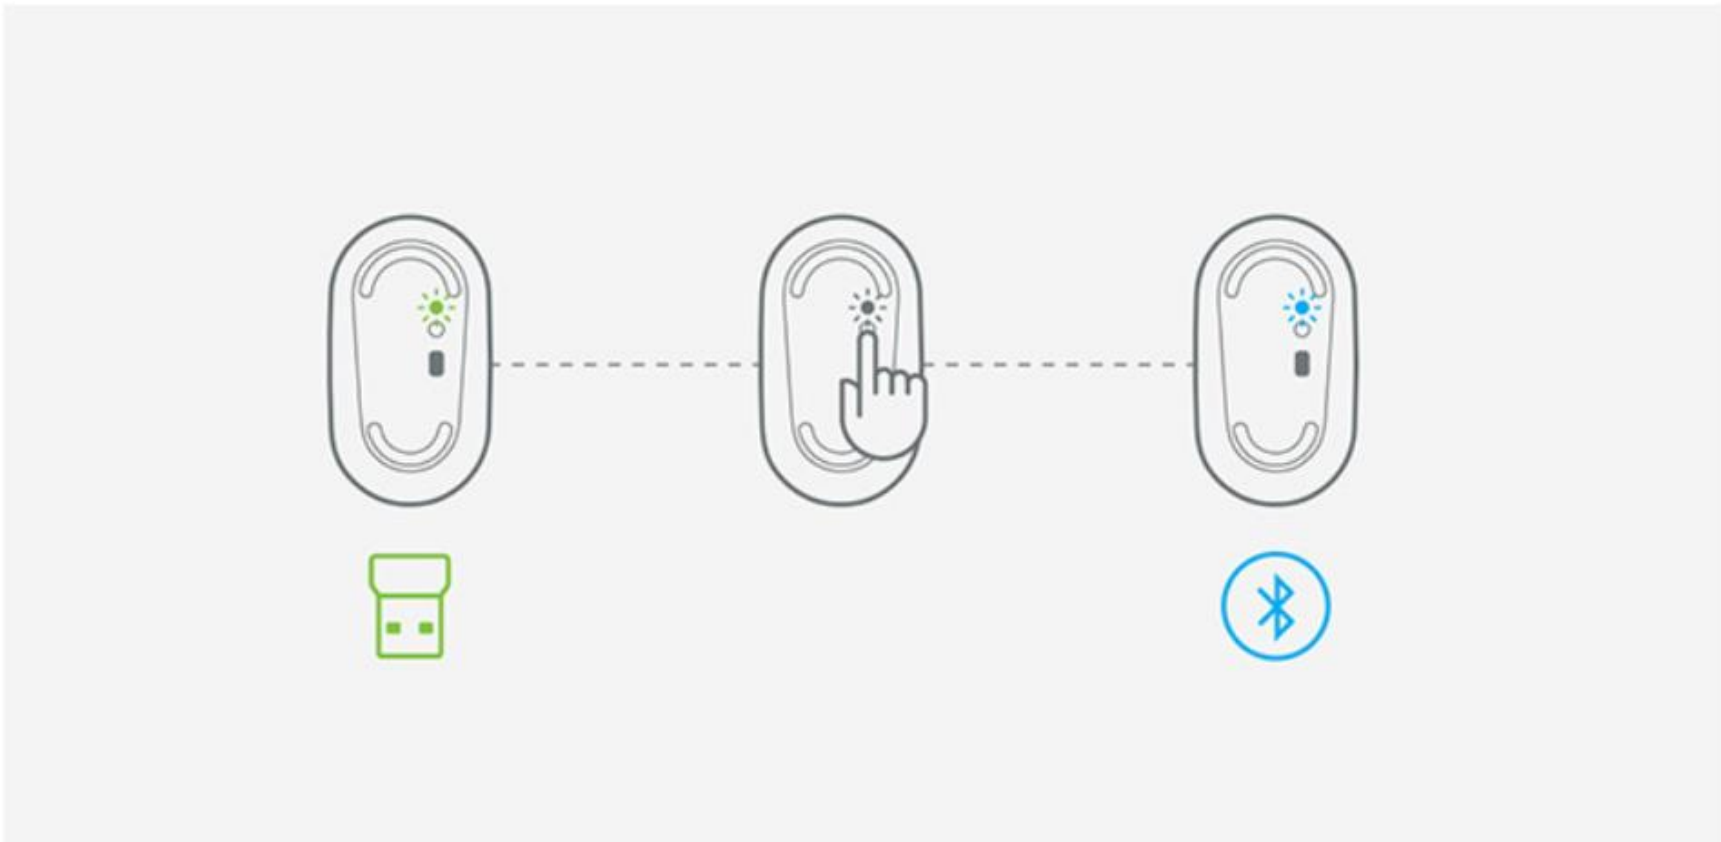

Step 3

Alternatively, connect using the USB receiver by plugging the receiver found inside your mouse into your computer. Easy peasy.

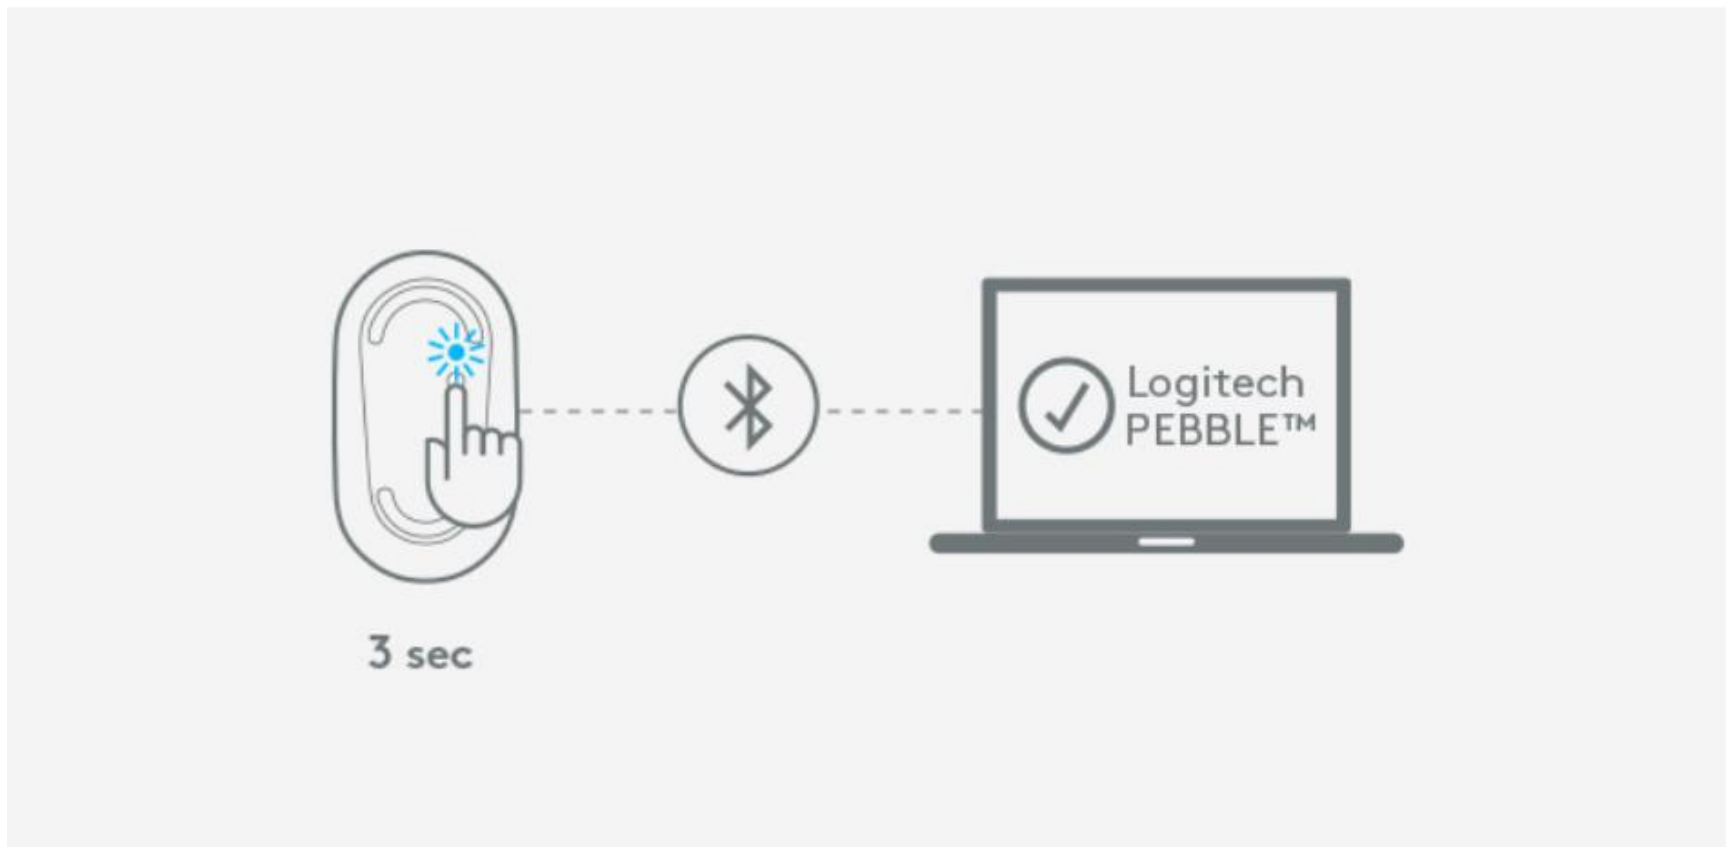

Step 4

Once paired you can easily switch between the *Bluetooth* and USB connections. Just press the button on the downside of the mouse for 1 second: Blue light is to use *Bluetooth* connection and Green light is for USB receiver.

Step 5

Pair another device via *Bluetooth* by pressing the button for 3 seconds. When the blue light starts blinking you are in pairing mode.
