

Sengled Smart LED Starter Kits or Sengled Smart Hub

- Soft White A19 Starter Kit
- Multicolor A19 Starter Kit

Introduction:

Sengled Smart LED bulbs offer an easy solution to having app-controllable smart lighting in your home. These bulbs enable you to control your lights in multiple ways—on/off, dimming, schedules, etc.—through the Sengled Home app on your phones or through partner programs like Amazon Alexa or Google Assistant.

Note: A hub is required to control Sengled Smart bulbs.

Each Sengled Smart Hub allows you to add up to 64 Sengled smart devices to control every room in your home.

Important Safety Information:

Before installing this Sengled Smart LED Starter Kit, please read and follow all precautions, including:

- Before replacing your current bulbs, please turn off the power and let cool to avoid electrical shocks and burns.
- Risk of electric shock. Do not attempt to disassemble bulb.
- Not suitable for use with standard wall dimmers.
- Not suitable for completely enclosed fixtures.
- Suitable for use in operating environment between -4°F and 104°F (-20°C and 40°C).
- Not for use in emergency lighting.
- Indoor use only.

Installation Instructions:

The following instructions are for installing your Sengled Smart LED Starter Kit. Please do not power on your bulbs until told to do so within the app. Also, ensure you are connected to a 2.4 GHz network before beginning installation. For more information, please reference your router's user manual.

- 1 Download the latest version of the Sengled Home App from the Apple App Store or Google Play Store.

- 2 Register and sign in to your Sengled account in the app.

- 3 Open the Sengled Home App. Go to Devices, select the + sign, and choose the applicable option: **Starter Kit** or **Smart Hub**.

Make sure your phone is connected to the same 2.4 GHz wi-fi network that your hub is connected to during the set up process.

Follow the guided steps to connect the Smart Hub to the internet. For Starter Kits, the pre-paired smart bulbs need to be powered on and assigned to a room.

Follow in-app instructions to finish installation.

- 4 Ensure your Sengled Home app can discover the bulbs. If the app unsuccessfully discovers the bulbs, please refer to the next section "Reset Instructions" for how to reset your bulb before attempting to add it back in.

Congratulations on successfully installing your smart kit or smart hub!

Installation Instructions Using Third-Party Integration:

If you would like to set up your Smart LED bulbs with a third-party integrator, such as Amazon Alexa or Google Home, please refer to support.sengled.com or your "Settings" tab in your Sengled Home app.

Reset Instructions:

For the Hub:

Locate the reset button on the side of the hub. Press and hold the button for 8 seconds, then release. If the reset is successful, the middle LED will flash 8 times. At this time, please re-attempt adding your hub with the Sengled Home App.

For the Bulbs:

To reset your Smart LED bulb, ensure that the bulb is on and then quickly turn the bulb off and on at least 10 times (using a light switch or power bar works best). If the reset is successful, the bulb will flash five times. If it does not flash five times, you will have to try again. Once successfully reset, please try to pair it in your Sengled Home app again.

Operation:

The following section outlines some of the popular operational modes of the Sengled Smart LED bulbs.

Applicable to all Sengled Smart LED bulbs:

A On / Off

Smart LED bulbs can be controlled through a variety of means:

- Manually via a wall switch
- Through Sengled Home App
- Through partner programs like Alexa, Google Assistant, IFTTT, etc.
- Through Sengled Smart Switch

B Dimming

Smart LED bulbs can be dimmed through the following:

- Through Sengled Home App
- Through partner programs like Alexa, Google Assistant, IFTTT, etc.
- Through Sengled Smart Light Switch

Note: Manual dimming via wall dimmers is not supported.

C Scheduling

Schedules can be created with the Sengled Home App.

Check the in-app how-to pages through "Settings" for the following two operations.

D Voice Control

- Set up Amazon Alexa by adding **Sengled Home Skill**.
- Set up Google Assistant by adding **Sengled Home Service**.

E Third Party Control

Utilize a third-party program (like IFTTT) to control your lights.

If you have Sengled Smart LED Multicolor bulbs, the following operations are also available:

F Tuning Whites

Adjust whites via the white palette in the Sengled Home app, or with voice control and third parties.

G Changing Colors

Change between 16 million colors using the color palette in the Sengled Home app, or with voice control and third parties.

Frequently Asked Questions:

1. Are Sengled Smart LEDs suitable for use with wall dimmers?

No, Sengled Smart LEDs are not suitable for use with wall dimmers, or other variable power devices. Dimming is supported via Sengled Home app or compatible smart devices only.

2. What should I do if the Sengled Smart Hub cannot be found or set up using the Sengled Home app?

Make sure your hub is connected to the Wi-Fi router directly with an Ethernet cable, and has power. After powering on the hub, the indicator lights will turn on (represented in blue in the diagram).

If the lights do not turn on, please reset your hub. If the lights do not turn on after a reset, please contact Sengled Support via the info on the last page.

3. Can different types of Sengled Smart devices be used simultaneously?

Yes, a single Sengled hub can support up to 64 Sengled smart devices, including smart LED bulbs, smart plugs, smart sensors, etc. For the latest selection, please check out sengled.com.

Limited Warranty:

3-year limited warranty from original purchase date. To learn more about the Limited Warranty for Sengled products, please visit www.sengled.com/warranty.
