

The filter of my Philips Juicer is blocked

If the filter of your Philips Juicer is blocked, please read our troubleshooting advice below.

The filter needs to be cleaned

If you want to clean the filter, first switch off your Philips Juicer. Thereafter, clean the feeding tube (marked with the number 5 on the image below) and the filter (marked with the number 3 on the image below) of the appliance. Once you have finished cleaning, process smaller quantity of fruits and/or vegetables.

Did this step not solve the issue? Please contact us for further assistance.

The appliance does not work. What should I do?

The appliance is equipped with a safety system. If the parts have not been assembled properly, the appliance does not work. Check whether the parts have been assembled in the right way, but switch off the appliance before you do so.
