LOCTITE

SPECIALTY

DESIGNED FOR SPECIFIC MATERIALS AND PROJECTS

Why Use Specialty?

- Hard to bond substrates requiring specialized formulas for long term durability.

Common Projects

Shoes

Nuts & Bolts

Plastic

Plumbing

Glass

Guide

SHOES - Most glues are rigid and stiff. You need a flexible glue to withstand impact over time.

NUTS AND BOLTS - For preventing unwanted loosening of fasteners. Cures when deprived of oxygen. Common uses:

Automotive (engine, brakes and suspension), Equipment (lawn mowers, snowblowers & tools), Home assembly (grills, outdoor furniture, play sets).

PLASTIC - Some plastics such as Polypropylene, Polyethylene & PTFE are difficult to bond with regular adhesive technologies.

PLUMBING - Waterproof formulas to seal everything around the house or boat. Common uses: sinks, showers, piping, through hull fastening.

GLASS - Crystal clear formula with long term UV resistance.
