

How To Use This Product

On Clothing

MIX UNTIL COMPLETELY DISSOLVED FOR BEST RESULTS

1. **FILL** scoop to Line 2 to 4 per gallon of water. (Follow instructions on package.) Submerge stained items in solution after dissolved.
2. **SOAK** 1-6 hours. Depending on severity of stain, some stains may require more time to soak.
3. **WASH** as normal.

On Hard Surfaces

USE SOLUTION WITHIN 6 HOURS

1. **FILL** scoop to Line 4 per gallon of water. (Follow instructions on package.) For some surfaces, like grout, a more concentrated paste may be used.
2. **APPLY** using a cloth, sponge, brush, or by pouring solution directly onto surface.
3. **LET STAND** 5-30 min. Scrub as needed. For large surfaces, work with small areas, so solution does not dry on the surface.
4. **RINSE** with clean water and blot until dry.

On Carpet

USE ONLY ON WATER-WASHABLE RUGS.

REMOVE excess stains before treating.

FILL to line 1 per 16 ounces of water.

APPLY only enough solution to saturate stain. Allow solution to stand 1-5 minutes. Do not allow solution to dry on fabrics. Blot with white towel. Repeat until stain is not visible. Rinse carpet with clean water and blot until dry.

On Upholstery

USE ONLY ON WATER-WASHABLE UPHOLSTERY.

REMOVE excess stains before treating.

FILL to line 1 per 16 ounces of water.

APPLY with clean white towel and use to blot out stain. Do not apply solution directly on stain. Repeat until stain is not visible. Then, dampen a clean white towel with water and blot area to rinse.
