

When NOT to use ?

- If your cats do not have access to an individual food/water bowl and litter box, competition will not resolve and the tension between your cats will continue
- FELIWAY *FRIENDS* will not help in cases of tension or even aggression towards owners. In such situations, we recommend to consult your veterinarian or a behaviourist.
- If the conflict between your cats is associated with spraying or scratching in the home, both FELIWAY *FRIENDS* and FELIWAY *CLASSIC* are recommended.
- The two diffusers should be plugged in where your cats spend most of their time. They can both be used in the same room.

Where NOT to use?

- Hallways: Cats spend very little of their time in hallways, so the efficacy would be weaker.

If conflict between cats occurs frequently in a hallway, distribution of your cat's' resources should also be considered within the home to ensure each cat has an easy and free access to a litter box, food and water bowl, resting area, without being potentially blocked by another cat.

Where to use?

- In the room where the cats spends most of their time
- Or in every room where tension or conflicts happen most often.

When to use?

- If you have 2 or more cats living together, and they are showing signs of tension such as chasing, blocking or staring.
- If your cats that live together are fighting, even if they have been fighting for a long time.

How long should I use it?

Most cats living together will benefit from a permanent use of FELIWAY *FRIENDS* to ensure harmony in your home. The minimum recommended duration is one month

How fast will I see results?

Many cat owners start to see results within the first 7 days.

However, every cat is unique. Depending on how long the tension between cats has been present and how severe the conflict may be, it may take longer to see effects. We recommend using FELIWAY *FRIENDS* for at least 1 month.

How does it work?

After the mother cat gives birth, she sends “harmony messages” to her kittens. These messages (scientifically called pheromones), released in the mammary zone, are naturally appeasing and ensure harmony between her kittens.

FELIWAY *FRIENDS* sends “harmony messages” to cats and helps restore harmony between cats living together.

Using feline natural appeasing messages, FELIWAY *FRIENDS* helps your cats live in harmony and avoids tensions, conflicts and fighting.
