

Induro has made a name for itself as one of the leading manufacturers of Professional Tripods and Monopods. The addition of the unique 5-Way Panhead to the already successful line of Professional Ballheads and Gimbal Heads assures photographers that Induro is on the forefront of product development and precision support gear.

### **Designed by Induro in the USA**

The new Induro product lineup was designed by our US design team with valuable input from photographers, dealers and engineers. The demands of photographers are always changing and the only way to keep ahead of these changes is to have a design team that understands the needs of photographers. That is why Induro has a team of designer/photographers always searching for that next new concept.

Designed and built for photographers who want the best support gear in the world, Induro makes the finest tripods money can buy.

## Induro Professional Ballheads

Induro has brought the professional ballhead to a new level. The new BHD-Series dual-action ballheads offer increased load capacities, large ergonomic locking knobs, adjustable drag and tension control, independent panning control and much more. To provide maximum strength and lighter weight, the BHD-Series ballhead is made of precision-machined Magnesium Alloy.

In response to photographers' requests, the tripod head has an Arca-Swiss® style quick release plate system for maximum compatibility and flexibility.

The Induro BHD line of ballheads is designed to handle virtually any shooting situation and equipment – from compact still and video cameras, to full-sized professional gear. The head has a 3/8-16 thread base mount and includes a matching Arca-Swiss compatible Quick Release Camera Plate.

## Features of the Induro BHD-Series Ballheads

- Magnesium Alloy – provides a lightweight ballhead with maximum strength
- Adjustable Manual Drag Control – provides fine adjustment to compensate for different camera/lens weights
- Independent 360° Pan Control – makes horizontal panoramic adjustments easy
- Oversized lock knobs – ergonomic knobs for easy locking and drag control, even with gloves
- Arca-Swiss compatible system – interchangeable QR system assures smooth and rapid camera/lens changes
- Includes Arca-Swiss compatible quick release plate

## Ballhead Specifications

\* For matching tripod series, refer to the first numeric digit of tripod model number.

## Induro Professional Gimbal Heads

When using long, heavy telephoto lenses for sports or nature photography, standard panheads and ballheads aren't the optimum solution. Induro Gimbal Heads are designed to make vertical and horizontal tracking of fast moving objects quick and easy. They're the ideal choice for serious photographers.

Balancing a camera/lens system by positioning the equipment at it's center of gravity makes it essentially "weightless," allowing your equipment to stay in place – at any angle or position – without needing to be "locked down." This provides a level of control, and freedom of movement not possible with any other support system. Of course, if you wish to fix the horizontal or vertical position, oversized lock knobs make it easy – even with gloves.

### Induro GHB2 Gimbal Head

When you need the maximum degree of control and flexibility, there is no better choice than the Induro GHB2 Gimbal Head. The GHB2's convenient calibrated vertical scale and height adjustable lens platform makes it easy to consistently position your camera/lens combination at the right position for repeatable results and perfect balance. The GHB2 head has a 3/8-16 thread base mount.

- Rugged design and construction
- Smooth, fast tracking horizontally and vertically
- Calibrated scale for repeatable positioning of lenses
- Horizontal adjustment of the lens platform allows precise positioning to find the center of gravity of any size lens and camera system
- Separate panning movement for total control
- Includes Arca-Swiss compatible quick release plate

### Induro GHB1 Gimbal Head

When you need a compact, portable gimbal head, the GHB1 provides outstanding results at an unbeatable price. The GHB1 head has a 3/8-16 thread base mount.

- Portable, compact design
- Smooth, fast tracking horizontally and vertically
- Separate panning movement for total control
- Includes Arca-Swiss compatible quick release plate

### Induro GHBA Gimbal Head

Simply slide the GHBA into the quick release platform of a heavy-duty ballhead and you're ready for action! The ultra-compact GHBA is designed to be attached to professional ballheads\* (like the Induro BHD-Series) that accept Arca-Swiss style quick release plates.

- Ultra-compact design
- Fits on high-performance ballheads\* (like the Induro BHD-Series) that accept Arca-Swiss compatible quick release plates (ballhead sold separately)
- Includes Arca-Swiss compatible quick release plate

\* Ballhead and tripod must be capable of supporting the weight of the camera/lens outfit. The ballhead must be a dual-action design with separate panning lock knob.

## Gimbal Head Specifications

CATALOG #	MODEL #	BASE DIAMETER, FITS TRIPOD*	WEIGHT		LOAD CAPACITY
			LB	KG	
<b>INDURO GH-SERIES GIMBAL HEADS</b>

## Induro 5-Way Panheads

INDURO PHQ-Series 5-Way Panheads offer a completely new concept in camera positioning with Quintaxially adjustable movements. Providing dual tilt, base and top plate rotation, and an Arca-Swiss style quick release system this head offers photographers full repeatable indexing on five axes for maximum control and flexibility. Unique folding control handles make packing and transport easy. Ideal for studio and on-location shoots plus extended panoramic, QTVR, spherical and 3D photography. Each head includes a matching Arca-Swiss compatible Quick Release Plate.

## Features of the Induro PHQ-Series Panheads

- Quintaxial Positioning (Patent Pending) – full five-way convenient and compact camera positioning system
- Five Fully Graduated Scales – see and set the position of your tilts, pans and shifts
- Five Bubble Levels – high-visibility levels can be viewed on all sides while making adjustments
- Horizontal and Vertical Pan Locking Controls – independent movement and locking controls
- Angular and Spherical Rotation – provide 360-degree rotational control on both base and head tilt axes
- Folding Front/Rear and Side/Side Tilt Handles (Patent Pending) – simplifies tripod/head packing and transport
- Variable Direction Arca-Swiss Compatible Quick Release Clamp – interchangeable industry standard QR system
- Nodal Point Orientation (with Optional 3rd Party Accessories) – extends the capabilities to advanced panoramic, QTVR, spherical and 3D photography
