

Installation instructions and tips for Royal Rascals® Car Seat Protector

Thank you for purchasing our Royal Rascals® Car Seat Protector.

Below are some important tips to help install your Royal Rascals® Car Seat Protector perfectly.

1. **Tab in First** - you'll find there is a stabilizer tab insert on the rear of the car seat protector. Push this firmly in between the seat cushion and the back cushion. This will help to hold the car seat protector in place.
2. **Top Strap Next** - fix the strap around the headrest so that the car seat protector is held firmly upright.
3. **Free the Organiser Pocket** - make sure the organiser pocket is hanging freely in front of the car seat and not accidentally tucked under.
4. **Install Your Baby Car Seat** - make sure your rear or forward-facing baby car seat is installed securely per the manufacturer's instructions and does not move around on the car seat protector.

Royal Rascals Car Seat Protectors will help to protect your car's upholstery by providing protection against stains, indents, scuffs and damage! The best way to clean your Car Seat Protector is to remove it from your vehicle and use warm water and a damp cloth or sponge. A non-abrasive general-purpose cleaner can also be used if needed to remove stubborn marks or stains.

Thanks again and have a great day with your family!

Best wishes,

Wendy, Lewis and the team @ Royal Rascals®
