Package Includes:

- 1 * TROND Prime Nano Travel Power Strip w/ USB Charger
- 1 * Welcome Guide

Product Diagram:

- ① American Plug (Type B, 3-Prong)
- ② 3 Standard American Sockets (100-250V Compatible)
- ③ Dual USB Charging Ports (Total Output: 2.4A, 12W)
- ④ Non-Glaring LED Indicator

Technical Specifications:

Model	Prime Nano
Plug & Socket(s)	Type B Plug to 3 Type B Sockets
Material	UL94 V-0 Flame-Retardant PC+ABS
Input Voltage	AC 100~250V, 50/60Hz
Rated Power	125V / 15A, Max. 1875W No Surge Protection
Output Per USB Port	DC5V \equiv 2.4A Max
USB Total Output	DC5V \equiv 2.4A, 12W
Dimensions	2.40*1.97*1.97 in (L*W*H) (the plug length is not included)
Net Weight	3.83oz / 109g

Product Features:

- **Expand Your Outlet.** It turns one wall outlet into three standard American sockets, together with 2 USB charging ports (2.4A total output), which creates a portable charging station for your various appliances and mobile devices;
- **Easy Access Design.** With the outlets on 3 sides of this outlet tap, it could allow 3 bulky or standard plugs to be used at the same time. USB ports are intentionally placed on the front side so that they could be easier to reach, and won't be blocked by other power adapters or cords;
- **Compact & Portable.** Measured only at 2.40" x 1.97" x 1.97", it doesn't block the other receptacle of the duplex wall outlet in your kitchen, bathroom or study room at home. The mini cubic design helps to save your precious luggage space and makes a great travel companion for you on the road;
- **Safety Assurance.** It's made of the top-grade UL94 V-0 flame-retardant PC & ABS, meaning burning stops within 10 seconds and NO flaming drips are allowed. Certified by FCC & ROHS, it can protect your electric devices from over-current /

over-charge / short-circuit / over-heated;

- Cruise Compliant with No Surge. Cruise ships don't allow power strips with surge protection on board for safety reasons, and many including Royal Caribbean even prohibit extension cords. TROND Prime Nano is specifically designed to meet all those rules and to be compliant with all cruise lines.

Frequently Asked Questions:

Q: Why those two USB ports don't charge my device properly, or the charging speed is slow?

A: Please verify whether:

- 1) it's securely plugged into an active outlet, and its white LED indicator gets lit up;
- 2) your USB charging cable isn't broken;
- 3) your device requires Quick Charge, which is NOT supported by Prime Nano.

If you think the USB module doesn't work properly,

please email us at support@etrond.com for the help.

Q: Can I use electric appliances such as hair dryer or curling iron with it?

A: The max. power consumption of Prime Nano is

1875W. Therefore as far as the total power consumption of all plugged electric devices do NOT exceed 1875W, it should be able to work without causing any issue.

Q: How do I check the input voltage and wattage of my electric devices?

A: Please refer to your device's user manual, original OEM charging adapter, or contact the device manufacturer to get this information.

Q: Can I use this travel power strip abroad?

A: Most countries and continents use their own electrical systems, which differ in both voltage/frequency and physical plug/socket. This specific model comes with the 3-prong plug (Type B), and can work in USA, Canada & Mexico. For other countries, please visit world-power-plugs.com. We also offer travel plug adapters with different plugs for other countries.

Safety Precautions:

Please read and observe the following safety points at all times.

Warning – Can Not Covert Voltage

TROND Prime Nano is a plug adapter, NOT a voltage converter or transformer. Therefore it cannot step up or down the voltage.

Warning – Grounding and Polarization

This 3-prong plug is designed to be inserted into a grounded-type American outlet (Type B) only. If this plug doesn't fit directly inside your outlet, do not attempt to force it into the outlet.

Warning – Liquid

Do not operate your TROND Prime Nano if liquid of any kind is spilled onto or inside it. Do not operate TROND Prime Nano near rain or water (e.g. kitchen sink, or bathtub).

Warning – Heat

Do not expose your TROND Prime Nano to direct sunlight or place it near wall heaters, space heaters, or any enclosed space prone to temperature increase.

Warning – Proper Cleaning

In general, the only cleaning necessary for your TROND Prime Nano is a light dusting. Unplug it from the wall outlet before cleaning it. Do not use any type of liquid or aerosol cleaners.

Warning – No User Serviceable Parts Inside

If your TROND Prime Nano is not operating properly for any reason, do not remove any part of this unit for repair by yourself. Unplug the unit and email us at support@etrond.com for the help.

Contact Us:

For any inquiries or comments concerning our products, please email us at support@etrond.com for the help. If you have the order number, please include it as reference. We will try to respond to all emails within 24 hours.
