MAGNETIC KNIFE STRIP

INSTALLATION INSTRUCTIONS

For use with clean, dry stainless-steel knives and objects only
For wall attachment only

1. Carefully separate mounting plate (A) and knife bar (B) and remove each piece from polybag. We recommend separating the pieces vertically.

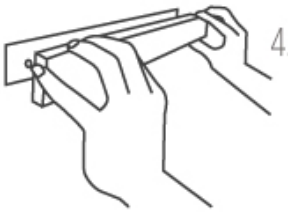

2. Place mounting plate against the wall, ensuring recessed holes are facing out. Mark placement of the holes on wall with a pencil.

3. Drill pilot holes where you have marked wall and tap plastic wall anchors into wall. Using provided screws, screw mounting plate onto wall.

⚠ WARNING

This magnet is very strong and can cause severe pinching! Keep fingers out of space between magnetic knife bar and mounting plate when attaching.

4. Carefully grasp front of magnetic knife bar with fingertips only. Make sure fingers are away from space between knife bar and mounting plate to prevent serious pinching injury! Line up knife bar and mounting plate, then attach.

5. Test objects on bar before hanging each time. Certain treated metals and heavier objects may not stick to bar and should not be used.

⚠ WARNING

Pacemakers and mechanical shunts may be reset if within close proximity to strong magnets.
