## **Warranty Exclusions**

The customer will incur the cost of the repair for any of the following:

- a. Damaged parts or components not sold or manufactured by ASUSTek.
- b. Parts repaired or replaced by parties other than ASUSTek Authorized Service Centers.
- c. Units purchased outside the service coverage regions; .
- d. Excluded Circumstances.

## **LCD Panel Bright/Dark Dot Warranty & Regulation**

Since LCD panel is made up of millions of micro electronic pixels, if one pixel no longer functions normally, it will become a bright or dark dot. By ISO 13406-2 standards, ASUS conforms to the acceptance level between 3 to 5 defective bright/dark pixels. In order to deliver ultimate vision experience to ASUS customer, if your panel is less than or equal to the above number of dots, then, it is considered as an acceptable LCD monitor. In addition, the Premium Range of ASUS LCDs offers a unique Zero Bright Dot (ZBD) warranty. Please refer to ASUS LCD Monitor Bright/Dark Dot Warranty Table below.

### **TAKING CARE OF YOUR LCD:**

- a. Turn off the LCD if you will not use it for a long time. Doing this will help you save electric power consumption and prolong your LCD's life.
- b. Do not touch the LCD with your fingers, sharp, and/or hard object so as not to scratch the LCD.
- c. Use monitor-cleaning sheet to lightly wipe off dirt from the LCD. Do not use your fingers!
- d. Do not use any chemicals or detergents to clean the LCD.
- e. Use screen saver to avoid the damage caused by long-term static (non-moving) images displayed.

## **ASUS LCD Monitor Bright/Dark Dot Warranty Table :**

**Applied Models:** General ZBD Models

| After Purchase | Bright Dot | Dark Dot |
|----------------|------------|----------|
| 12 months      | 0          | $\leq 5$ |
| 13~36 months   | $\leq 3$   | $\leq 5$ |

**Applied Models: PA Series**

| After Purchase | Bright Dot | Dark Dot |
|----------------|------------|----------|
| 36 months      | 0          | $\leq 5$ |

**Applied Models: Non-ZBD Models**

| After Purchase | Bright Dot | Dark Dot |
|----------------|------------|----------|
| 36 months      | $\leq 3$   | $\leq 5$ |

1. A Pixel consists of sub-pixels: one red, one green and one blue dot. A bright dot is a sub-pixel that is always on under Black pattern. A dark dot is a sub-pixel that is always off under any pattern.
2. Micro Dot, less than or equal to 1/2 dot ( $50\mu\text{m}\phi$ ), is excluded in the warranty
3. Non-ZBD/ZBD warranty models may vary from different regions.

Manufacturers' warranties may not apply in all cases, depending on factors such as use of the product, where the product was purchased, or who you purchased the product from. Please review the warranty carefully, and contact the manufacturer if you have any questions.
