

User Guide

1 About this user guide

Important: For important information on the safe use of your device and battery, read “For your safety” and “Product Safety” info in the printed user guide, or at www.nokia.com/support before you take the device into use. To find out how to get started with your new device, read the printed user guide.

KEYS AND PARTS

Your phone

This user guide applies to the following models: TA-1272, TA-1264, TA-1284, TA-1281, TA-1278, TA-1280.

- | | |
|-----------------------|-----------------------------|
| 1. Scroll key | 7. Flashlight |
| 2. Microphone | 8. Right selection key |
| 3. Call key | 9. Power/End key |
| 4. Left selection key | 10. Loudspeaker |
| 5. Earpiece | 11. Back cover opening slot |
| 6. Headset connector | 12. USB connector |

Avoid touching the antenna area while the antenna is in use. Contact with the aerial affects communication quality and may reduce battery life because of the higher power levels required while operating the device.

Do not connect to products that create an output signal, as this may damage the device. Do not connect any voltage source to the audio connector. If you connect an external device or headset, other than those approved for use with this device, to the audio connector, pay special attention to volume levels. Parts of the device are magnetic. Metallic materials may be attracted to the device. Do not place credit cards or other magnetic storage media near the device, because information stored on them may be erased.

Some of the accessories mentioned in this user guide, such as chargers, headsets, or data cables, may be sold separately.

Note: You can set the phone to ask for a security code to protect your privacy and personal data. Select **Menu** > **Settings** > **Security** > **Keyguard** > **Security code**. Note, however, that you need to remember the code, as HMD Global is not able to bypass it.

SET UP AND SWITCH ON YOUR PHONE

Nano-SIM

Important: This device is designed to be used with a nano-SIM card (see figure) only. Use of incompatible SIM cards may damage the card or the device, and may corrupt data stored on the card.

Note: Switch the device off and disconnect the charger and any other device before removing any covers. Avoid touching electronic components while changing any covers. Always store and use the device with any covers attached.

Open the back cover

1. Place your fingernail in the small slot at the bottom of the phone, then lift and remove the cover.
2. If the battery is in the phone, take it out.

Insert the SIM card

1. Slide the SIM card holder to the left and open it up.
2. Place the nano SIM in the SIM slot face down.
3. Close down the holder and slide it to the right to lock it in place.

Insert the second SIM

1. Slide the SIM card holder of the SIM2 slot to the right and open it up.
2. Place the nano SIM in the SIM2 slot face down.
3. Close down the holder and slide it to the left to lock it in place. Both SIM cards are available at the same time if neither of them is being used, but while one SIM card is active, for example, making a call, the other may be unavailable.

Tip: To find out if your phone can use 2 SIM cards, see the label on the sales box. If there are 2 IMEI codes on the label, you have a dual-SIM phone.

Insert the memory card

1. Slide the memory card in the memory card slot.
2. Put the battery back in.
3. Replace the back cover.

Switch on your phone

Press and hold .

CHARGE YOUR PHONE

Your battery has been partially charged at the factory, but you may need to recharge it before you can use your phone.

Charge the battery

1. Plug the charger into a wall outlet.
2. Connect the charger to the phone. When done, unplug the charger from the phone and then from the wall outlet.

If the battery is completely discharged, it may take several minutes before the charging indicator is displayed.

Tip: You can use USB charging when a wall outlet is not available. Data can be transferred while charging the device. The efficiency of USB charging power varies significantly and it may take a long time for charging to start and the device to start functioning. Make sure your computer is switched on.

KEYPAD

Use the phone keys

- To see your phone's apps and features, select **Menu** on the home screen.
- To go to an app or feature, press the scroll key up, down, left, or right. To open an app or feature, press the scroll key.

Lock the keypad

To avoid accidentally pressing the keys, lock the keypad: Press . To unlock the keypad, press the scroll key and select **Unlock** > .

Type with the keypad

Press a key and then use the scroll key to select the letter you need.

To enter a space press **0**.

To type a special character or punctuation mark, select **≡** > **Insert options** > **Insert symbol**.

To switch between character cases, press **#** repeatedly.

To type in a number, press a number key and use the scroll key to select the number.

4 Calls, contacts, and messages

CALLS

Make a call

Learn how to make a call with your new phone.

1. Type in the phone number. To type in the + character, used for international calls, and press * twice.
2. Press . If asked, select which SIM to use.
3. To end the call, press .

Answer a call

Press .

CONTACTS

Add a contact

1. Select **Menu** >  > **+ New contact**.
2. Enter the name and the number.
3. Select  > **OK**.

To add more contacts, select  > **Add new contact**.

Save a contact from the call log

1. Select **Menu** > .
2. Scroll to the number you want to save, select  > **Add to Contacts** > **New contact**.
3. Add the contact's name, check that the phone number is correct, and select  > **OK**.

Call a contact

You can call a contact directly from the contact list.

Select **Menu** > , scroll to the contact you want to call, then press the Call key.

SEND MESSAGES

Write and send messages

1. Select **Menu** >  > **+ New message**.
2. In the Recipients field, enter the recipient's number, or select  > **Contacts** to add recipients from your contact list.
3. Enter the message in the message field.
4. To insert smileys or symbols in the message, select  > **Insert options** > **Insert smiley** or **Insert symbol**.
5. Select **Send**.

5 Personalise your phone

CHANGE TONES

Set new tones

1. Select **Menu** > **⚙️** > **Personalisation** > **Sounds**.
2. Select the tone you want to change.
3. Scroll to the tone you want and select **Select**.

CHANGE THE LOOK OF YOUR HOME SCREEN

Choose a new wallpaper

You can change the background of your home screen.

1. Select **Menu** > **⚙️** > **Personalisation** > **Lock screen background** > **Wallpapers**.
2. Scroll to the wallpaper you want, and select **Select**.
3. If you want to apply the wallpaper, select **✓**.

GET THE MOST OUT OF THE TWO SIM CARDS

Your phone can have two SIM cards which can be used for different purposes.

Select which SIM card to use

Select **Menu** > **⚙️** > **Connectivity** > **Dual SIM**.

- To choose which SIM card to use for calls, select **Preferred SIM for calls**.
- To choose which SIM card to use for messages, select **Preferred SIM for messages**.
- To choose which SIM card to use for mobile data, select **Mobile data connection** > **Preferred SIM**.

Tip: You can rename your SIM cards to make it easier to distinguish between them. Select **Menu** > **⚙️** > **Connectivity** > **Dual SIM** > **SIM settings**. Select a SIM card and then **SIM name**.

6 Internet and connections

BROWSE THE WEB

Connect to the Internet

Note that the browser may vary by your region and work differently.

1. Select **Menu** > **📶**.
2. Enter a web address, and tap **OK**.

BLUETOOTH®

Connect your phone to other devices with Bluetooth.

Switch on Bluetooth

1. Select **Menu** > **⚙️** > **Connectivity** > **Bluetooth**.
2. Switch **Bluetooth** on.
3. Select **Devices found** and the Bluetooth device you want to connect to.

7 Music

MUSIC PLAYER

You can listen to your MP3 music files with the music player.

Listen to music

To play music, you need to store the music files on a memory card or on the phone memory.

1. Select **Menu** > .
2. Select **Songs** to see all your saved music.
3. Scroll to a song and select **Play**.

You can also create your own playlists.

To adjust the volume, scroll up or down.

LISTEN TO RADIO

Listen to your favourite radio stations on your phone

Select **Menu** > . Your phone searches for stations automatically when you turn the radio on. To change the volume, scroll up or down. To save a station, select  > **Add to favourites**. To switch to a saved station, select  > **Favourites**, then select the station you want. To close the radio, select  > **Close radio**.

8 Clock, calendar, and calculator

SET THE TIME AND DATE MANUALLY

Change the time and date

1. Select **Menu** >  > **Time & language** > **Date and time**.
2. Switch **Auto-update** off.
3. To set the time, select **Time** and enter the time.
4. To set the date, select **Date** and enter the date.
5. Select **Save**.

ALARM CLOCK

Learn how to use the alarm clock to wake up and get to places on time.

Set an alarm

No clock around? Use your phone as an alarm clock.

1. Select **Menu** > .
2. Select **+ New alarm** and enter the alarm time and other details.
3. Select  > **Save**.

CALENDAR

Need to remember an event? Add it to your calendar.

Add a calendar event

1. Select **Menu** > .
2. Select a date and **+ New event**.
3. Enter the event details, and select **Save**.

CALCULATOR

Learn how to add, subtract, multiply, and divide with your phone's calculator.

How to calculate

1. Select **Menu** > .
2. Enter the first factor of your calculation, use the scroll key to select the operation, and enter the second factor.
3. Press the scroll key to get the result of the calculation.

Select  to empty the number fields.

9 Erase your phone's data

REMOVE PRIVATE CONTENT FROM YOUR PHONE

If you buy a new phone, or want to dispose of or recycle your old phone for any other reason, here's how you can remove your personal info and content. Note that it is your responsibility to remove all private content.

Remove content from your phone

When removing private content from your phone, pay attention to whether you are removing content from the phone memory or the SIM card.

To remove messages, select **Menu** > . Select  > **Delete conversations**, select all the message threads, and then .

To remove contacts, select **Menu** > . Select  > **Delete contacts**, select all the contacts, and then .

To remove your call info, select **Menu** > . Select  > **Delete all** > **OK**.

Check that all your personal content has been removed.

10 Product and safety information

FOR YOUR SAFETY

Read these simple guidelines. Not following them may be dangerous or against local laws and regulations. For further information, read the complete user guide.

SWITCH OFF IN RESTRICTED AREAS

Switch the device off when mobile phone use is not allowed or when it may cause interference or danger, for example, in aircraft, in hospitals, or near medical equipment, fuel, chemicals, or blasting areas. Obey all instructions in restricted areas.

ROAD SAFETY COMES FIRST

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

INTERFERENCE

All wireless devices may be susceptible to interference, which could affect performance.

AUTHORISED SERVICE

Only authorised personnel may install or repair this product.

BATTERIES, CHARGERS, AND OTHER ACCESSORIES

Use only batteries, chargers, and other accessories approved by HMD Global Oy for use with this device. Do not connect incompatible products.

KEEP YOUR DEVICE DRY

If your device is water-resistant, please refer to its IP rating for more detailed guidance.

PROTECT YOUR HEARING

To prevent possible hearing damage, do not listen at high volume levels for long periods. Exercise caution when holding your device near your ear while the loudspeaker is in use.

SAR

This device meets RF exposure guidelines when used either in the normal use position against the ear or when positioned at least 0.2 inches (5 mm) away from the body. The specific maximum SAR values can be found in the Certification Information (SAR) section of this user guide. For more information, go to www.sar-tick.com.

When a carry case, belt clip, or other form of device holder is used for body-worn operation, it should not contain metal and should provide at least the previously-stated separation distance from the body. Note that mobile devices may be transmitting even if you are not making a voice call.

EMERGENCY CALLS

Important: Connections cannot be guaranteed in all conditions. Never rely solely on any wireless phone for essential communications like medical emergencies.

Before making the call:

- Switch the phone on.
- If the phone screen and keys are locked, unlock them.
- Move to a place with adequate signal strength.

To place an emergency call on any screen, press key number 5 for 4 seconds.

1. Press the end key repeatedly, until the home screen is shown.
2. Type in the official emergency number for your present location. Emergency call numbers vary by location.
3. Press the call key.
4. Give the necessary information as accurately as possible. Do not end the call until given permission to do so.

You may also need to do the following:

- Put a SIM card in the phone.
- If your phone asks for a PIN code, type in the official emergency number for your present location, and press the call key.
- Switch off the call restrictions on your phone, such as call barring, fixed dialling, or closed user group.

TAKE CARE OF YOUR DEVICE

Handle your device, battery, charger, and accessories with care. The following suggestions help you keep your device operational.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that corrode electronic circuits.
- Do not use or store the device in dusty or dirty areas.
- Do not store the device at high temperatures. High temperatures may damage the device or battery.
- Do not store the device at cold temperatures. When the device warms to its normal temperature, moisture can form inside the device and damage it.
- Do not open the device other than as instructed in the user guide.
- Unauthorised modifications may damage the device and violate regulations governing radio devices.
- Do not drop, knock, or shake the device or the battery. Rough handling can break it.
- Only use a soft, clean, dry cloth to clean the surface of the device.
- Do not paint the device. Paint can prevent proper operation.
- Keep the device away from magnets or magnetic fields.
- To keep your important data safe, store it in at least two separate places, such as your device, memory card, or computer, or write down important information.

During extended operation, the device may feel warm. In most cases, this is normal. To avoid getting too warm, the device may automatically slow down, close apps, switch off charging, and if necessary, switch itself off. If the device is not working properly, take it to the nearest authorised service facility.

RECYCLE

Always return your used electronic products, batteries, and packaging materials to dedicated collection points. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. Electrical and electronic products contain a lot of valuable materials, including metals (such as copper, aluminium, steel, and magnesium) and precious metals (such as gold, silver, and palladium). All of the materials in the device can be recovered as materials and energy.

CROSSED-OUT WHEELIE BIN SYMBOL

Crossed-out wheelie bin symbol

The crossed-out wheelie bin symbol on your product, battery, literature, or packaging reminds you that all electrical and electronic products and batteries must be disposed of via separate collection at the end of their working lives. Do not dispose of these products as unsorted municipal waste: take them for recycling. For information on your nearest recycling point, check with your local waste authority.

BATTERY AND CHARGER INFORMATION

Battery and charger safety information

To unplug a charger or an accessory, hold and pull the plug, not the cord.

When your charger is not in use, unplug it. If left unused, a fully charged battery will lose its charge over time.

Always keep the battery between 59°F and 77°F (15°C and 25°C) for optimal performance. Extreme temperatures reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily. Accidental short-circuiting can happen when a metallic object touches the metal strips on the battery. This may damage the battery or the other object.

Do not dispose of batteries in a fire as they may explode. Obey local regulations. Recycle when possible. Do not dispose as household waste.

Do not dismantle, cut, crush, bend, puncture, or otherwise damage the battery in any way. If a battery leaks, do not let the liquid touch the skin or eyes. If this happens, immediately flush the affected areas with water or seek medical help. Do not modify, attempt to insert foreign objects into the battery, or immerse or expose it to water or other liquids. Batteries may explode if damaged.

Use the battery and charger for their intended purposes only. Improper use or use of unapproved or incompatible batteries or chargers may present a risk of fire, explosion, or other hazard, and may invalidate any approval or warranty. If you believe the battery or charger is damaged, take it to a service centre or your phone dealer before continuing to use it. Never use a damaged battery or charger. Only use the charger indoors. Do not charge your device during a lightning storm.

SMALL CHILDREN

Your device and its accessories are not toys. They may contain small parts. Keep them out of the reach of small children.

MEDICAL DEVICES

Operation of radio transmitting equipment, including wireless phones, may interfere with inadequately shielded medical devices' function. Consult a physician or the medical device's manufacturer to determine if it is adequately shielded from external radio energy.

IMPLANTED MEDICAL DEVICES

To avoid potential interference, manufacturers of implanted medical devices recommend maintaining a minimum distance of 15.3 centimetres (6 inches) between a wireless device and the medical device. Persons who have such devices should:

- Always keep the wireless device more than 15.3 centimetres (6 inches) away from the medical device.
- Not carry the wireless device in a breast pocket.
- Hold the wireless device to the ear opposite the medical device.
- Switch the wireless device off if there is any reason to suspect that interference is taking place.
- Follow the manufacturer directions for the implanted medical device.

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

HEARING

Warning: When you use the headset, your ability to hear outside sounds may be affected. Do not use the headset where it can endanger your safety.

Some wireless devices may interfere with some hearing aids.

PROTECT YOUR DEVICE FROM HARMFUL CONTENT

Your device may be exposed to viruses and other harmful content. Be cautious when opening messages. They may contain malicious software or otherwise be harmful to your device.

VEHICLES

Radio signals may affect improperly installed or inadequately shielded electronic systems in vehicles. For more information, check with the manufacturer of your vehicle or its equipment. Only authorised personnel should install the device in a vehicle. Faulty installation may be dangerous and invalidate your warranty. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable or explosive materials in the same compartment as the device, its parts, or accessories. Do not place your device or accessories in the air bag deployment area.

POTENTIALLY EXPLOSIVE ENVIRONMENTS

Switch your device off in potentially explosive environments, such as near petrol or diesel pumps. Sparks may cause an explosion or fire resulting in injury or death. Note restrictions in areas with fuel, at chemical plants, or where blasting operations are in progress. Areas with a potentially explosive environment may not be clearly marked. These are usually areas where you are advised to switch your engine off, such as below deck on boats, chemical transfer or storage facilities, and where the air contains chemicals or particles. Check with the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) to see if this device can be safely used in their vicinity.

CERTIFICATION INFORMATION (SAR)

This mobile device meets guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields), recommended by

international guidelines from the independent scientific organization ICNIRP. These guidelines incorporate substantial safety margins that are intended to assure the protection of all persons regardless of age and health. The exposure guidelines are based on the Specific Absorption Rate (SAR), which is an expression of the amount of radio frequency (RF) power deposited in the head or body when the device is transmitting. The ICNIRP SAR limit for mobile devices is 2.0 W/kg averaged over 10 grams of tissue.

SAR tests are carried out with the device in standard operating positions, transmitting at its highest certified power level, in all its frequency bands.

This device meets RF exposure guidelines when used against the head or when positioned at least 5/8 inch (1.5 centimetres) away from the body. When a carry case, belt clip or other form of device holder is used for body-worn operation, it should not contain metal and should provide at least the above stated separation distance from the body.

Your mobile device is also designed to meet the requirements for exposure to radio waves established by the India Department of Telecommunications. These requirements set a SAR limit of 1.6 W/kg averaged over one gram of tissue.

To send data or messages, a good connection to the network is needed. Sending may be delayed until such a connection is available. Follow the separation distance instructions until the sending is finished.

During general use, the SAR values are usually well below the values stated above. This is because, for purposes of system efficiency and to minimise interference on the network, the operating power of your mobile is automatically decreased when full power is not needed for the call. The lower the power output, the lower the SAR value.

Device models may have different versions and more than one value. Component and design changes may occur over time and some changes could affect SAR values.

For more info, go to www.sar-tick.com. Note that mobile devices may be transmitting even if you are not making a voice call.

The World Health Organization (WHO) has stated that current scientific information does not indicate the need for any special precautions when using mobile devices. If you are interested in reducing your exposure, they recommend you limit your usage or use a hands-free kit to keep the device away from your head and body. For more information and explanations and discussions on RF exposure, go to the WHO website at www.who.int/peh-emf/en.

ABOUT DIGITAL RIGHTS MANAGEMENT

When using this device, obey all laws and respect local customs, privacy, and legitimate rights of others, including copyrights. Copyright protection may prevent you from copying, modifying, or transferring photos, music, and other content.

COPYRIGHTS AND OTHER NOTICES

Copyright

The availability of products, features, apps, and services may vary by region. For more information, contact your dealer or your service provider. This device may contain commodities, technology, or software subject to export laws and regulations from the US and other countries. Diversion contrary to law is prohibited.
