10 HOOKAH BOWL TIPS: HOW TO PACK A HOOKAH BOWL

M.ROSENFELD

The hookah flavour is composed of several components: These are the taste of the tobacco, the hookah charcoal, the liquid used in the base. There are as many combinations as there were, are and will be hookah smokers. There are plenty of tobacco flavours which can be mixed in different proportions. Choose the flavour to your liking and create your own unique taste.

Here we have collected the best 10 hookah bowl tips.

1 TIP

There are many ways to pack a bowl, and certainly we can't say which one is the best. E.g. with the classical and simplest construction of the bowl it is very important that tobacco and hookah charcoal do not come into contact, otherwise the mixture burns up easily which causes bitter aftertaste.

2 TIP

Before packing a bowl don't squeeze out the tobacco. You can absorb the excess molasses with a tissue, but all molasses should't be pressed out. This is exactly what creates the taste and smoke. If it were not so important, not every manufacturer would add it to tobacco.

3 TIP

When mixing tobacco, we recommend you to choose combinations that fit together as well as possible. Ask yourself: "Do i want to eat this mixture?" If so, then the combinations fit in well together.

4 TIP

If you choose the fruit bowl, we recommend you the grapefruit at the beginning. Before you start, put the fruit in the freezer for 10-15 minutes so it won't become deformed and soft during packing a bowl.

5 TIP

If you want a strong hookah, you have to squeeze the tobacco hard. If taste is more necessary for you, press it lightly.

6 TIP

What if the tobacco is burned out? Don't worry! Just remove the coal and stir the tobacco in the bowl. The lower unburned layers come up and you can continue to enjoy your bowl.

7 TIP

What if the bowl is small but tobacco leaves are big? After squeezing out the pieces, cut them into 2 mm pieces. This will make smoking much easier.

8 TIP

When packing the bowl with a very damp tobacco, you must squeeze it out and let the leaves open. In order not to extract too much moisture from the tobacco, we recommend you to squeeze it out only with your hands, with no cloths.

9 TIP

If you want to buy a universal bowl or your first bowl, then the glazed American Phunnel is the best choice. This is an appropriate one for such tobaccos as Tangiers, Dark Side, Fumari etc. This bowl is good for beginners as well as for experienced professional smokers.

10 TIP

If you want to enjoy the hookah smoking to the full, it is always advisable to use your favorite mix. The choice of combinations is entirely up to you, depends on what dominant flavour you want it to be and what aftertaste you expect to feel.
