

WHAT IS

URETHANE

We make our urethane products from a high-density, rigid foam like material. The urethane forms in a detailed mold that gives it the detail and density of a carved wood product. Urethane is a resilient material that is moisture, pest, and rot resistant. It is also light-weight making it easy to install.

How is it Finished?

We deliver our urethane products pre-primed and ready to paint, faux finish or gel stain.

How is it Installed?

Installing urethane is simple. Apply construction adhesive to the back, push in place, and fasten with a pin nailer.

Can I use it on the Interior and Exterior of the Home?

Yes! Urethane is great for both interior and exterior applications. It can withstand all weather conditions. It is also impervious to moisture, pests, and rotting
