

How to Upgrade Firmware

1. Please connect wireless CarPlay adapter to a USB power adapter.
2. Turn on your iPhone's WIFI and join the Wi-Fi named "smartBox_ xxxx".
3. Enter the password "88888888".
4. Visit <http://192.168.1.101> in your Safari.
5. Update the firmware online from your iPhone on that page. (Click update, the light will be blinking. After the update succeed, the light will be stop blinking.)
6. You can also submit the problem description on the page

Warm tips:

1. Make sure your iPhone is connecting to the Wi-Fi name "smartBox_XXXX" in the process of upgrading.
2. It takes 3-4mins to upgrade the firmware. The orange/green light is flashing until the upgrade is successful
3. Do not power off the CarPlay wireless Adapter during the upgrade.
4. If the Carless Adapter is working normally, DO NOT upgrade

Please Attention:

The firmware is being updated continuously.

If you have updated the firmware, the wireless carplay adapter still do not work.
