Brush head replacement: Hold the brush head with your hand and pull it out, then insert other brush heads.

3. Angle Adjustment

The angle adjustment button on either side of the spindle can be pressed for a maximum of 84°.

Warm Tips

How to have a better cleaning?

Before using the electric spin scrubber to clean, please soak the stains with cleaning solution for 5-10 mins.

Why does the brush head stop rotating when using?

Please hold the electric spin scrubber stick to aim at dirty spots without applying too much pressure on the rotating brush head, or the brush could be cut off and get damaged. The brush head will stop rotating.

Why do all the indicator lights keep flashing?

Please check whether the handle and the body are assembled in place. After assembly, when the indicator lights stop flashing, Restart the machine.

Errors and Corrective Measures
