How to use

1. How to use sealed mason jars
1.1. Correctly select the required caliber sealer (wide mouth/regular mouth);
1.2. Put the food into the mason jar (do not letthe food be completely filled, it is recommended that the food should not exceed the bottom thread of the mason jar mouth, in order to achieve a better vacuum sealing effect)

It is recommended that the food does not exceed this thread, in order to achieve a better vacuum sealing effect.

1.3. Wipe the mouth of the bottle and the sealing cap clean, and there should be no dirt or liquid residue;

1.4. Align the bottle cap with the mouth of the bottle (see the picture below)
