Sanlida Dragon X8 Problem-solving Instruction

Never dry fire the bow!

Situation 1: Problem with bow string&cables

① String&Cables -Set up

Instruction video link: https://youtu.be/dq7bIBa_m_o

②String exploded & frayed

If below situation occurs without dry fire the bow , please contract with us by email immediately ! We will replace new string and cables for you.

Situation 2: Problem with peep sight

①peep hole is sideways and crooked

②peep sight popped out

Please follow the instruction video to install and adjust the position

video link : https://youtu.be/dq7bIBa_m_o

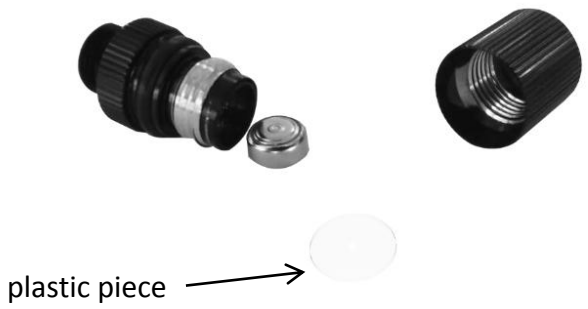

③peep sight was not installed or missing

please email us or leave message, we will send you new one.

Situation 3: Problem with Sight

①Sight light doesn’t work

There is a plastic piece between the batteries,please remove the bettery protector and try again

②The fiber optics don't work on the scope

You need to replace it with new fiber optic, we would like to cover the cost for you.

Situation 4: Problem with Arrow Rest

①About the screw

There is only one screw to hold the arrow rest, there are two holes for you to decide which one to put the screw, but one screw works well. The space is not enough for two screws.

②Arrow Rest Broken

In this case, please email us immeiately, we will send you new one!

Situation 5: Missing parts

The Dragon X8 Package includes many screws and small parts, if any bolts or accessories is missing , please email us to get replacement.

Situation 6: Bow Broken/Damaged on Arrival

All the bows sold by Sanlida are totally new. If the bow you received is not packed well, please contact with us first to check whether the bow is among the returned ones from warehosue. We will contact with Amazon to replace new bow to you.
