LET'S FIND YOUR STREET SHOE SIZE

4 EASY STEPS TO FIND YOUR SHOE SIZE

Ensuring the proper shoe fit is essential to protecting and cushioning your feet while dancing. Poorly fitting shoes can be painful and cause foot problems like bunions, corns, calluses, stress fractures and more.

For over 130 years Capezio has been crafting quality footwear in a wide range of sizes and styles. Most of our shoe styles are measured off of **street shoe size**, or the size you would wear in your comfortable everyday shoes.

Certain footwear styles are purposely sized small so we'll recommend ordering 1 or 2 sizes larger than your street shoe size. For shoe styles that are sized large we'll recommend ordering 1 or 2 sizes smaller than your street shoe size.

Please refer to styles bullet points for sizing suggestions.

FOOT SIZING GUIDELINES

All you'll need to find your street shoe size is a printout of this document. For the most accurate results, measure at the end of the day while barefoot.

STEP 1

Print this document at 100%—do not scale to fit. To ensure it's printed at 100%, place a credit or ID card in the box provided. If it's an exact fit, then you're ready to move on.

STEP 2

For Women's and Men's footwear sizing, combine Part 1 and Part 2 of the tool by cutting at the designated lines and taping together.

STEP 3

Stand with one foot on the measuring device, evenly distributing your weight between both feet. Align the back of your heel with the solid line at the bottom of the chart.

STEP 4

Check which line your longest toe reaches—that's your street shoe size. Note that the thick lines are full sizes and the smaller thin lines are half sizes. If you are in-between sizes we usually recommend sizing up.

Some people's feet are slightly different sizes. If you think this might be the case, we recommend you measure both feet and order based off the larger measurement.
