Specs

Dimensions/Weight

- **Control pod:**2.5" H x 1.13" W
- **Each satellite speaker:**8.9" H x 5.8" W x 3.8" D (1.9 lbs)
- **Acoustimass® module:**8.5" H x 6.75" W x 16.75" D (15.4 lbs)
- **System in carton:**10.5" H x 15.25" W x 19.75" D (27 lbs)

Features

- Specially engineered speaker arrays come fully assembled on stands for optimum performance and more usable desktop space.
- Handy control pod houses volume control, single-touch mute, headphone jack and connection for a second audio source such as an MP3 player.
- Compact Acoustimass module provides clean low frequencies, allowing the desktop speakers to be very small without sacrificing performance. Module can be hidden neatly under your desk.
- Proprietary TrueSpace® surround digital processing circuitry reproduces enveloping sound from just two visible speakers. Engineered for computer speaker listening, it creates a dramatic acoustic environment for games, DVDs and music.
- Single USB connection links the system to your computer. No special software, sound card upgrade, adapters or complicated wiring needed.
- Digital 5.1 audio playback brings music, games, movies and other 5.1-encoded material to life with much of the performance you'd expect from a five-speaker system.
- Magnetically shielded satellite speakers prevent monitor interference or damage to magnetic media.
- Proprietary integrated signal processing delivers lifelike performance at almost any volume level.
- Compression circuitry keeps your music clear and undistorted at high volume levels.
- Active electronic equalization balances low, mid and high frequencies for more natural tone and clarity.
