YOUR EQUIPMENT SAFER THAN EVER

PROTECT YOUR GEAR AND
CHECK THE SAFETY PAYLOAD

For the first time in the imaging industry, UNI/PdR 105:2021 establishes an official reference practice for payload safety providing full transparency about payload measurements to consumers.

INTRODUCING A NEW SAFE APPROACH TO LOAD CAPACITY

No more gear purchased on arbitrary product specifications:

UNI/PdR 105:2021 guarantees that a support loaded with a weight equal to the declared **safety payload** is never jeopardized, no matter the position, taken all the safety parameters into account.

Whereas, **Max payload** indicates the maximum load a support can hold, sometimes not taking safety parameters into account. This means that applying the maximum weight, the support's safety and functionality might be compromised.

SAFETY PAYLOAD

Testing and research has resulted in the payload declaration which ensures product performance, granted the following conditions are met:

HEAD

A photo/video equipment with a weight equal to the Safety Payload UNI/PdR 105:2021 must never slip out of the docking seat in any position the head can take. The loaded head can be firmly and securely locked into every position using an acceptable effort.

TRIPOD

The telescopic leg sections, center column and spider of the tripod must never collapse under the action of a photo/video equipment whose weight equal to the Safety Payload UNI/PdR 105:2021. The locking mechanisms should be fastened into place using an acceptable effort.

MONOPOD

The telescopic leg sections of the monopod must never collapse under the action of a photo/video equipment whose weight equal to the Safety Payload UNI/PdR 105:2021. The locking mechanisms should be fastened into place using an acceptable effort.

WHENEVER YOU SEE THIS

CONFIDENT IN THE
PAYLOAD DECLARATION

UNI: THE INDEPENDENT ITALIAN PAN-SECTOR REGULATORY AUTHORITY

The reference practice UNI/PdR 105:2021 has been published by UNI (Ente Nazionale Italiano di Unificazione) the independent Italian pan-sector regulatory body recognised internationally CEN and ISO. As such, UNI is entrusted with the development, publication and promotion of standards and best practices to improve efficiency and effectiveness of the socioeconomic system together with consumer and environmental protection.
