Product Description

Picture in Picture Live View (PIP)—This brand new feature allows a user to pair one Wyze Cam OG with another Wyze Cam OG camera (or Wyze Cam OG Telephoto Camera). PIP lets you view the livestream of two cameras at the same time, and swap the large view and smaller view with one tap. Move, enlarge, or collapse the Picture in Picture view.

3x Telephoto Lens—Get a closer look at a particular area of interest like a mailbox, shed or crib with a crystal-clear 3x telephoto lens.

Upgraded Livestream Experience—Faster loading livestream and notifications, with improved microphone and speaker.

Color Night Vision—The award-winning starlight sensor amplifies low light and shows dark areas in vivid, unbelievable detail.

IP65-Rated Weather Resistance—All-weather, year-round, indoor and outdoor security.**

24/7 Recording—MicroSD card-ready for uninterrupted 24/7 recording. Up to 30 days on one 265 GB card.*

Two-Way Audio—Speak in real time to anyone in front of the camera, whether you're confronting a stranger or checking in on a loved one.

Brand New User Interface—A completely redesigned app experience with simplified Event navigation and customizable detection zones.

Works with Alexa and Google Assistant—Receive alerts and use voice commands to check and manage your devices. You can also create schedules and automations in the Wyze app.

Storage Temperature	-40°F - 158°F (-40°C - 70°C)
Integrations	Alexa, Google Assistant, IFTTT
Weather Resistance	Indoor and Outdoor (IP65)

FAQs

What is the difference between Wyze Cam OG and the Telephoto 3x?

There are two key differences: The telephoto camera has a 3x telephoto lens, while the standard OG camera has an integrated spotlight. Both are great cameras with all of the features you know and love. Use Wyze Cam OG to monitor your home with a wide angle lens. Use Wyze Cam OG Telephoto 3x to clearly monitor points-of-interest that are further away.

Can I use the Telephoto 3x camera on its own?

Yes, the telephoto cam can be used as a standalone camera, without a Wyze Cam OG. But we like using them both together - you get the OG's integrated spotlight, Telephoto's 3x closer details, and the ability to view the livestream of both cameras at the same time.

Is Wyze Cam OG Telephoto 3x wireless or battery-powered?

No, Wyze Cam OG Telephoto 3x is not wireless or battery powered. It is powered via the included 6 ft USB cable.

Can I use the telephoto cam outdoors?

Yes, Wyze Cam OG Telephoto 3x is IP65-rated and can be used both indoors and outdoors, rain or shine.

How many cameras can I stack together?

You can stack 2 total cameras together, in any combo! That could be a Wyze Cam OG and a Telephoto 3x, or two OG cams, or two telephoto cams.

What is the resolution of Wyze Cam OG Telephoto 3x?

1920 x 1080p Full HD.

What is the frame rate of Wyze Cam OG Telephoto 3x?

Day: 20 frames per second (fps); Night: 10 fps.

Does Wyze Cam OG Telephoto 3x support 5 GHz Wi-Fi?

No, Wyze Cam OG Telephoto 3x only supports 2.4 GHz networks.

What is Color Night Vision?

Wyze Cam OG Telephoto 3x is equipped with a starlight sensor that allows the camera to see color in extremely low light conditions, allowing you to see full color at night.

Is Wyze Cam OG compatible with Wyze Web View?

Yes, Wyze Cam OG Telephoto 3x is compatible with Wyze Web View.
