

ANT-140-020-10

10 ft SMA Male to N Male Coax Cable (195 size)

Applications

- 4G/LTE & 5G Antennas
- Cellular Modems, Routers & Amplifiers
- Lightning Arresters
- ADS-B Receivers
- HAM Radio Equipment
- NOT for use with TV or WiFi Applications

Product Features

- SMA Male Connector
- N Male Connector
- 50 Ohm Solid Copper Core
- Thin and Flexible
- Gold Plated Signal Pins
- PE Outer Jacket - 0.195 inch Diameter
- Heat Shrink Tubing on Connectors
- Low Signal Loss at Common Wireless Frequencies

Ordering Information

Part No.	Description
ANT-140-020-10	Proxicast 10 ft Low-Loss Coax Extension Cable (50 Ohm) - SMA Male to N Male

General Description

Proxicast's ANT-140-020-10 SMA to N coax cable is the perfect solution for connecting 4G/5G or other antennas with N-Female connectors up to 10 ft from their radio source. It can also be used to connect to inline lightning arresters, amplifiers or other equipment with N-Female connectors.

All of Proxicast's coax extension cable assemblies are constructed with top quality extremely low-loss cable and gold plated connectors. Each cable assembly is fully tested.

CFD195 coax is the same diameter as RG-58 and RG-316 but has far superior performance characteristics, matching or exceeding LMR195 cable.

The cable's tough polyethylene jacket withstands abrasions and provides excellent moisture resistance. This cable assembly can be used indoors or outdoors.

For cellular (600 – 6000 MHz) applications, Proxicast recommends 195-size coax for assemblies up to 10 ft, 240-size up to 25 ft and 400-size up to 75 ft. It is acceptable to use a thick cable for the long portion of a cable run and a short thin cable to connect to equipment or antennas, just minimize the total cable length and number of connectors.

All outdoor coax connections must be weather-proofed to prevent damage caused by moisture entering the connectors. Use our Pro-Grade Self-Bonding Silicone Tape ([ANT-900-002](#)) for fast & easy connection sealing.

NOTE: This cable assembly has a standard SMA connector, not the reverse polarity SMA connector typically found on WiFi equipment. Standard and reverse SMA connectors will not mate; nor will they mate with the "F" connectors found on most consumer video equipment (TV, cable boxes, etc.).

ANT-140-020-10

10 ft SMA Male to N Male Coax Cable (195 size)

Specifications

Parameter	Rating
Connector 1	SMA Male (Inline Plug)
Connector 2	N Male (Inline Plug)
Cable Length	10 ft (3.048m)
Coax Type	Low-loss CFD195-E ¹ (0.195 inch / 5 mm diameter) Meets or exceeds specifications of LMR195 ² Not rated for direct burial or plenum applications
Jacket Material	Polyethylene (PE)
Color	Black
Impedance	50 Ohm
Capacitance	24.3 pF/ft
Velocity of Propagation	80%
Minimum Bend Radius	0.5 inch (12.7 mm)
Operating Temperature	-4°F to +140°F (-20°C to +60°C)

Signal Attenuation Including Connectors

Frequency (MHz)	Loss (dB)
700	1.1
900	1.3
1700	1.8
1900	1.9
2400	2.1
2700	2.3
5000	3.2
5800	3.4

Operation outside the parameter ranges given above may cause permanent damage.

Installation Instructions

- Observe minimum bend radius during installation and handling
- Do not cut or splice
- Minimize the number of connectors and total length of the cable run
- Fully tighten coax connectors to antenna connectors
- Weather seal outdoor coax connections
- Install in-line lightning protection if required by local building, fire, insurance or safety codes
- Not rated for direct burial or plenum applications
