

Usage Instructions

Step 1: Lift to remove outer cover

Step 2: Insert 3 AA batteries

Step 3: Remove refill cap, insert by pushing upright into device until you hear a “click”. Be sure to push until the unit clicks, locking the bottle in place.

Step 4: Replace outer cover.

Step 5: Turn on device with slider (blue light will flash). Select Low, Medium or High fragrance intensity setting.

Please note, the device will run for an 8 hour cycle, releasing puffs of mist regularly, then go into standby until next day (for 16 hours) and then start again. This is to conserve power and fragrance oil until it's needed again.

To change start time - push slider to off, then on at desired time setting.

Blue indicator light on top of the gadget illuminates when the units is initially turned on, settings are changes and fragrance is emitted.

The device comes with 3 fragrance settings. Low setting releases fragrant mist for 4 seconds between 17 minute intervals. Medium setting releases fragrant mist for 5 seconds between 12 minute intervals. High setting releases fragrant mist for 6 seconds between 7 minute intervals.

The device will make a soft, high pitched sound when the fragrance refill needs to be replaced
