FryAway
cooking oil solidifier

INSTRUCTIONS

Before using FryAway, please refer to the usage chart on the back of the product packaging

3 Steps to Easy Oil Cleanup and Disposal

FryAway must be added into HOT oil <u>and stirred</u> until fully dissolved

FryAway does not ABSORB oil, it SOLIDIFIES oil and needs heat to activate.

If your pan looks like this after adding FryAway, Reheat the oil until the flakes are fully dissolved

SMART USE

- For animal fats/grease start with ½ recommended amount of FryAway
- Once FryAway is added, oil may not be consumed or reused for cooking

TROUBLESHOOTING TIPS

FryAway product didn't fully dissolve in oil

- Oil wasn't hot enough. Reheat oil and stir until product is no longer visible

Oil didn't solidify even after flakes dissolved and oil cooled down

- Too much oil. Reheat oil and add more FryAway product

Oil stuck to the pan

- Too much FryAway. Warm pan to loosen, DO NOT SCRAPE. FryAway is made of natural, non-toxic plant-based fats. Any residue can be addressed by simply adding a small amount of oil and reheating.
