

[Can I use the ghd styler with Keratin treatments?](#)

Because ghd stylers are designed with advanced temperature control, many manufacturers have found that they are a very effective tool to use with Keratin treatments. However, all Keratin treatments vary, and therefore we would recommend you consult your Keratin treatment supplier to understand what's needed.

[What styler is best for my hairtype?](#)

The ghd V Gold Mini styler is ideal for shorter, textured styles or men's hair.

ghd IV styler, ghd V Gold Classic styler and ghd eclipse® styler - are all suitable for mid length to long hair. Perfect for achieving straight, curls, flicks and waves.

The ghd V Gold Max styler or ghd IV salon styler with wider plates are ideal for use on long, thick hair and ideal for styling large sections.

For more challenging hair we recommend our revolutionary ghd eclipse® styler with breakthrough tri-zone™ technology that maintains the optimum styling temperature, so you can style faster with less heat, for unbeatable shine and stronger hair that looks glossy and healthy for longer.

[Can you curl as well as straighten with the ghd V Gold Classic styler?](#)

The ghd V Gold Classic styler is designed to enable creative styling – flicks, waves, curls or the perfect straight. The ghd V Gold Classic styler has a round barrel for easy curling, and introducing a smooth movement swivel connector that makes the styler easy to manipulate during creative styling sessions. Stylists have told us that the lighter weight of the ghd V Gold Classic styler has made curling easier than ever.

[How long is the cord on the stylers?](#)

The ghd V Gold Series stylers have a 2.7m length power cord for optimal use and ease of connectivity in salons and at home.

[How quickly should my styler heat up?](#)

The ghd V Gold Series stylers heat up fast, in less than 30 seconds (40 seconds for USA voltage) so that you don't have to wait to start styling. When it reaches temperature you will hear 3 consecutive beeps and the logo on the switch will remain constantly lit to indicate it is ready for styling.

[Does my styler have a sleep mode?](#)

Safety continues to be a priority at ghd. For your safety and peace of mind there is a sleep mode feature on both the ghd IV stylers and ghd V Gold Series stylers. After 30 minutes without being used, the heated plates will switch off. When in sleep mode the light will flash and a warning beep will sound every 20 seconds. Simply switch the styler off then on again to resume styling.

[What is the operating temperature of the ghd V Gold Classic styler?](#)

The ghd V Gold Series stylers are designed to operate at 175°C - 185°C. At ghd, we have found that this is the optimal operating temperature for our advanced ceramic heater technology to create superior results whatever the hair type or style that you are looking to achieve. Stylists have told us they've been really impressed with the results they've achieved with the ghd V Gold Series stylers.

[What is the heating technology in the ghd V Gold Series styler?](#)

The ghd V Gold Series stylers continue to use ghd's advanced ceramic heater technology, however we've redesigned some of the heater control systems to make sure that they're performing at their best. Stylists have told us they've been really impressed with the results they've achieved with the ghd V Gold Series stylers.

[How have you made the ghd Gold Series lighter?](#)

We've made the ghd V Gold Series stylers more weight efficient. By improving and modernising the design we've been able to reduce the amount of material used in its construction compared to a ghd IV stylers. Stylists have told us that they can really feel the difference and that the new ghd V Gold Series stylers are easier to handle and to style with, especially when curling.

[What are the plates made of?](#)

As with ghd IV stylers, the plates are made of aluminium which is used because it has powerful heat conducting properties – four times better than steel. The aluminium is coated with a thin layer of an advanced ceramic coating, which helps the plates glide smoothly through the hair and leaves hair looking shiny. The combination of the excellent heat properties of aluminium and the smoothing properties of the thin ceramic coating gives you the great styling results you expect from ghd.

[What is the difference between the ghd IV styler, ghd V Gold Series and ghd platinum™?](#)

As technology advances so does design and as a result we offer a range of stylers to meet your styling needs. Choose from a selection of ghd stylers to provide the ultimate professional salon finish.

- **ghd IV styler range:** The original multi-award winning ghd styler, perfect for creating curls, waves or the perfect straight.
- **ghd V gold series:** Available in three different sizes; ghd V gold classic styler, ghd V gold max styler and ghd V gold mini styler, the ghd V gold series range is our sleekest ever styler with luxurious golden plates that smooth effortlessly through the hair for an ultra-shiny, high-gloss finish.
- **ghd platinum™:** Our revolutionary new ghd platinum™ styler contains breakthrough tri-zone™ technology that maintains the optimum styling temperature, so you can style faster with less heat, for unbeatable shine and stronger hair that looks glossy and healthy for longer.
