Air Cleaner

25-79m² room size
Numerical air quality feedback

AC2887/10

Healthier Air, Always

AeraSense, making the invisible visible

AeraSense is an innovative technology with the accuracy and performance of a professional sensor. It senses harmful particles smaller than even PM2.5, ensures the purifier adjusts for cleaner air output and provides real time feedback.

High performance from start to finish

- Automatically monitors, reacts & purifiers the air
- VitaShield naturally purifies UFP as small as 0.02microns
- 3 auto modes: General, Allergen, and Bacteria & Virus
- Aerodynamic architecture boosts efficient airflow

Reassurance of consistent clean air delivery

- Real time indoor PM2.5 numerical feedback
- Healthy air lock and alert for filter replacement

Designed for better user experience

- Low noise at Sleep Mode (20.5dba) - soft as a whisper
- Smart light control: adjust light to suit your preference

Global Certification for quality assurance

- AHAM (US), Ecarf (EU) and Airmid (US) Certified

PHILIPS

Highlights

AeraSense technology

AeraSense is a sensor that accurately identifies fine particles that are even smaller than PM2.5 (including most common indoor airborne allergens). It then processes this information to ensure that the purifier's settings are at the ideal level for current air conditions, and for continuous re-assurance. Then gives you feedback of real time indoor air quality by showing PM2.5 level.

Low noise

When in Silent Mode, the Purifier turns down its fan speed and noise level to allow a comfortable night's sleep.

Real time feedback

The numerical PM2.5 indicator and the 4-step color ring provides real time feedback of your indoor air quality.

Smart light control

Both AQI and the light on the UI can be dimmed and/or turned off to avoid light disturbance for consumers.

VitaShield IPS technology

VitaShield IPS with its aerodynamic design and NanoProtect Filter has a boosted clean air delivery rate up to 344 m³/hr* (according to China GB/T 18801-2015). It can effectively remove ultra-fine particles as small as 20nm, effectively reduce harmful gases such as formaldehyde, TVOC and odor. Removes up to 99.9% bacteria and virus*.

Aerodynamic design

Aerodynamic architecture boosts efficient airflow

Global Certification

Ecarf (EU) and Airmid (US) Certified

Healthy air protect

The filter lifetime is accurately calculated based on indoor pollution level, air flow and operation time. The healthy air protect alert lets you know promptly when it is time to replace the filter. If the filter is not replaced promptly, the appliance stops functioning - to avoid ineffective purification. So you are assured of healthier air always.

3 auto modes

The Philips Air Purifier has 3 automatic purification settings: a General mode, an extra-sensitive Allergen mode, and an extra-powerful bacteria and virus mode. You can choose your preferred mode to personalize and optimize your purification.

Specifications

Design and finishing

- Air quality sensor(s): Aerasense PM2.5 sensor
- Color of control panel: Black
- Fan speed indicators: Silent, Speed 1, 2, 3, Turbo
- Material of main body: Plastic
- Color(s): White

Performance

- Filters out PM2.5: in one hour, >99 %
- Filters out viruses: in 0.5 hr, 99.9 %
- CADR (cigarette smoke): 333 m³/h

Technical specifications

- Cord length: 1.6 m
- Effective area: 24~41 m²
- Frequency: 50/60 Hz
- Power: 11~60 W
- Sound level: 20.5-51 dB(A)
- Voltage: 220-240 V

Country of origin

- Made in: China

Replacement

- AC filter: FY2420
- HEPA filter: FY2422

Sustainability

- Stand-by power consumption: <0.5 W

Weight and dimensions

- Dimensions of packaging (LxWxH): 412 x 294 x 612 mm
- Dimensions of product (LxWxH): 359 x 240 x 558 mm
- Weight incl. packaging: 9.3 kg
- Weight of product: 7.7 kg

Issue date 2017-11-07

* Particle CADR: tested by third party according to GB/T 18801-2008
* 20 Nanometers: Tested by IUTA. According to 2008 Microbiological Risk Assessment Report of the World Health Organization (WHO), the avian influenza, human influenza viruses, Legionella, Hepatitis viruses and SARS coronavirus are larger than 20 nanometer (0.00002 mm).

* Removes 99.97% particles: Tested in 2015 by 3rd party lab

* Bacteria and Virus removal performance is tested by 3rd party lab. Refer to item 1 for bacteria performance test details and item 2 for virus removal test details.

* Bacteria and Virus removal performance is tested by 3rd party lab. Refer to item 1 for bacteria performance test details and item 2 for virus removal test details.
