Safety Warning

Because solid-state Tesla coils work in a strong magnetic field, strong electric field, the surrounding metal objects, including wires, cables, and nearby electronic equipment will generate an induced current, and generate strong electromagnetic radiation. As a result, the start-up experiment may lead to life-threatening failure of these devices as they are carried by implantable/non-implantable electronic medical devices. Those with pacemakers are not allowed. Those with pacemakers please stay away from the equipment.

Fire warning

while tesla coil works, power components, radiators and other parts will produce heat. It's especially obvious if the test works continuously. So prohibit to put any inflammable and explosive items around the tesla.

Disclaimer

Operation of Tesla Coil has a certain danger, may lead to personal injury or property damage, the result has nothing to do with the designers and sellers of the equipment.
