| SWITCHING | Ambidextrous push/toogle |

*Runtime until output drops below 50 lumens.

DESCRIPTION

This newly enhanced version of our best-selling SureFire X300 Ultra now delivers a stunning 600 lumens of LED-generated output focused by a precision TIR lens, creating a far-reaching high-intensity beam—with a larger center spot—that offers the power to positively identify threats at significant distances while temporarily impairing an adversary’s vision. This intense beam also provides extensive peripheral illumination for maintaining situational awareness.

The rugged X300 Ultra with its T-slot clamp—new for the summer of 2015—attaches securely to the Universal and Picatinny rails (fitting more models than ever before) found on most handguns, and it will fit many popular rail-less handguns by using SureFire’s MR adapter mounts. As always for this best-in-class model, it features integral one-finger ambidextrous momentary- and constant-on switching and can be equipped with SureFire’s optional DG handgun grip switch. This versatile WeaponLight also attaches to the Picatinny rails on long guns—more securely than ever before—and can be activated via an optional XT remote switch that gives you precision control of the light while letting you maintain a proper grip on your weapon. Wield the best.

FEATURES / BENEFITS

- Special high-performance LED produces 600 lumens
- Custom TIR lens creates smooth, far-reaching light with a larger center spot beam
- Integral ambidextrous momentary- and constant-on switching
- Attaches securely to both Universal and Picatinny accessory rails
- Weatherproof O-ring and gasket sealing
- High-strength aerospace aluminum body, Mil-Spec hard anodized for extreme durability
- Accepts optional pressure-activated DG and XT remote switches for precision control without altering grip on weapon
- Backed by SureFire’s No-Hassle Guarantee
