

## LIGHT IT UP

Keep your pup safe on a night walk. Activate Night Light any time through the Whistle app. Choose from three settings: Slow Flash, High Flash, Always On.

## TIPS & TRICKS

If your device takes a swim, just wipe it down before recharging. Whistle GO Explore has been IPX8 certified at 2m water submersion for 30 minutes.

Be sure to charge your Whistle device regularly to keep it running for all your pet's adventures.

Whistle GO Explore

QUICK START GUIDE FOR HUMANS

## UNBOX YOUR GOODIES

## LET'S GET STARTED

We'll get you off and running in no time. It's best to set up your device at home since you'll need a Wi-Fi connection.

### STEP 1 - CHARGE DEVICE

Plug charger cable into Micro-USB port. Plug the other end into a USB power outlet (5V recommended). When the LED lights up, device is ready for setup. Charging can take up to 2 hours.

**LIGHT GUIDE**  
**Orange** - Charging  
**Blue** - Syncing  
**Green** - Charged

### STEP 2 - DOWNLOAD & SET UP APP

Keep device plugged in during setup. Download Whistle app. The on-screen instructions will walk you through activating your device. When prompted, pick a subscription plan.

### WHAT IS A SUBSCRIPTION PLAN AND WHY DO I NEED ONE?

The subscription plan covers our connection to the AT&T cellular network to track and monitor your pet.

### STEP 3 - ATTACH & GO

#### ATTACHING COLLAR ATTACHMENT

**SNAP ATTACHMENT** Place collar into part B recess, line up A and B, then snap together.

**HOOK-AND-LOOP ATTACHMENT** Wrap strap around collar, and insert strap through top loop. Wrap strap around loop, pull tight, then press soft and scratchy sides together to secure.

#### WHICH ATTACHMENT SHOULD I USE?

Snap attachment is designed for thinner, flat collars that are less than 1" wide and is the more permanent option. Hook-and-loop is designed for thicker and wider flat collars, or rope collars and is adjustable.

#### ATTACHING & DETACHING DEVICE

**!** To avoid damage to device, carefully follow directions.

**TO ATTACH** Insert device into collar attachment, then turn **CLOCKWISE** until it snaps into place.

**TO DETACH** Press release button on the collar attachment, then turn the device **COUNTERCLOCKWISE**. Lift to remove.
