

Thank you for choosing **MaximalPower™** Solar Animal Repeller.
Please read this instruction and keep it for your future reference.

This repeller is designed to help you to scare away uninvited animal visitors, such as coyote, deer, raccoon, rats, etc., The built-in Passive Infrared (PIR) detection system detects movement and triggers short bursts of powerful ultrasonic sound wave and strong flash light to scare away the animals without physically hurting them. This animal repeller is a safe and effective tool to keep unwanted animal away.

Buttons on the repeller.

- Right Button controls Sensitivity. It adjusts the sensitivity and distance. By turning the knob clockwise, the sensitive range will increase.
- Left Button controls Frequency. It adjusts the ultrasonic sound frequency. By turning the knob clockwise, the frequency will increase.

Left Button Frequency level as below:

- 0: OFF
- 1: 13KHZ-20KHZ to repel animals such as mice, rats, martens etc
- 2: 18KHZ-25KHZ to repel animals such as cats, coyote, foxes etc
- 3: 23KHZ-35KHZ to repel animals such as deer, birds, monkey etc
- 4: Strong flashing lights to repel animals such as raccoon, boar, martens etc
- 5: Functions 1-4 are all active, sweeping frequency from mode 1 to mode 2 to mode 3 to mode 4, all followed by strong flashing.

How to charge the repeller.

1. Charge by solar panel
2. Charge with USB cable

Specifications:

Power Supply: 1pcs 3.7V 1200MAH Re-chargeable Lithium battery

DC port input: 5V 500Ma-1000mA (to connect USB charging cable)

Detection Angle: 120 degree arc

Detection Range: minimum sensitivity 5 meters (16 ft), max sensitivity 10 meters (32 ft).

WHERE TO PLACE THE DEVICE

1. Install the animal repeller in any desired location, but make sure the device faces the location you want to protect.
2. You can stick the repeller into the ground with metal spike included
3. Or you can hang the repeller on the wall, tree or fence with the holes on the back.

Note:

When using this device for the first time, please fully charge the battery. When the power supply is low, the red light of the low voltage indicator will continue to flash. You can connect the repeller to AC power outlet with the USB cable. The red light will remain on during charging until the battery is fully charged.

The normal life time for rechargeable lithium battery is about 2 years. When you find the battery runs out of power frequently, you may need to replace a new battery.

WARNING:

- This is not a toy, please keep far away from children under age of 3.
- We do not recommend using it under bad weather like rainstorm, typhoons or a long period of rainy season as these are electronic products that may break due to too much exposure to water.
- Even though this item is designed to be installed outdoors in various weather, please ensure the unit is installed in a manner that water cannot exceed the waterproof safety line (Note the illustration)

ADDITIONAL INFORMATION RELATIVE TO ULTRASONICS

The ultrasonic sound of this unit has to be powerful to repel effectively, but unfortunately some humans can hear part of its range (young people and children). Please try to install the device as far as possible from human interaction to help avoid any unexpected annoyance. It is not advised to use this device when children are playing nearby. It is recommended to deactivate the unit until children are no longer in the area.

SATISFACTION GUARANTEED

Thank you and we appreciate your recent purchase of MaximalPower Solar Repeller. Our products are unconditionally guaranteed during the initial 30-day home trial period. During the home trial period, if you are not completely satisfied for any reason, you may return the merchandise for exchange.

We provide a 1-year warranty from the date of purchasing. This product is protected for the first year of purchase from manufacture defects and does not include any kind of misuse or mistreatment.

If the product is found to be defective under the conditions stated above AFTER the 30-day home trial period, but within first year of purchase, please contact our customer service for return and exchange instruction. Please note we may need charge shipping and processing fee after 30-day home trial period.

For payment refund, please return the defective unit to the retailer where you purchased the product.
