Use Instructions

After washing your hair, rub it down thoroughly. Use the switches, to set the fan speed and the drying temperature to style your hair.

ABOUT YOUR PRODUCTS

Hyper-speed Long life Motor

The hair dryer is equipped with a self-developed unique more than 110,000 RPM HYPERSPEED motor & the impeller adopts the aircraft turbine engine shaped, which makes the air outlet wind speed up to more than 30m/s.

Built-in Ion Emission System

Equipped with super anion emitter, will release more than 10 million negative ions under the strong airflow, not only can remove the hair static, smooth the hair, tighten the hair scales, let the hair coruscating luster,can also quickly and gently dry hair, improve the health of the hair.

Convenient buttons + Memory Function Switch

Fashionable and elegant buttons: 3 speed wind, 3 temperature settings equipped with LED light display+cold air button. The independent open key has the memory function. If you open it again, it will follow the previous setting.

VENTURI EFFECT

The air outlet has been designed to multiply the air flow dispensed by the motor. The extra air flow is produced by the vacuum effect without using any more power.

Innovative Microfilter

Prevent even the smallest dust particles from entering the engine, enhance your hair cleaning and extend the life cycle of the engine. It will also prevent your hair from being entangled in the filter.

Impressive fast drying, low noise

Designed with centrifugal 13 fan blades, ultra-strong digital motor, the speed exceed 110,000RPM, and produce stable airflow for the fastest drying, less than 81dB which brings you a pleasant blowing experience.

Specifications

Model: US-IG-HD2003

Input voltage: 125V 60Hz

Power: 1875W

Power cord: 6 ft

Noise level: ≤81 dB

USE INSTRUCTIONS

1. Make sure that your hands are completely dry before connecting the appliance to the mains.
2. Press the power switch and adjust the speed & temperature to best meet your needs. When switched on for the first time, the hair dryer will blow air at the minimum temperature and intensity.
The air flow speed & temperature LED indicator lights will light up.

AIR FLOW SPEED

The hair dryer is equipped with an air flow button. The air flow has 3 levels (low-middle-high), When you press the air flow button, the air flow level and LED indicator light will be changed accordingly among low-middle-high.

TEMPERATURE SETTINGS

The hair dryer is fitted with 3 temperature levels (low-middle-high) that can be adjusted by the temperature button. When you press the temperature button, the temperature level and LED indicator light will be changed accordingly among low-middle-high.

COOL AIR BUTTON

You can use the 'Cool Air' button during hair drying to promote a long-lasting style. When press the button & turn on the Cool Air, the temperature LED indicator light will be off. Press Cool Air button again to turn it off, the temperature will return to the previous setting.

MEMORY FUNCTION

The hair dryer has a memorization function that allows preserving the temperature selected for previous use. This function allows establishing the temperature and the air flow speed ideal for your need and hair type, guaranteeing a practical and efficient use.

ACCESSORIES

- 1 concentrator nozzle
- 1 diffuser for optional

IMPORTANT

Use IG INGLAM's original accessories only

CLEANING AND MAINTENANCE

All our hair dryers feature an innovative system that prevents hair getting into contact with motor parts. Keep your appliance well maintained in order to ensure the best performance and to extend product life cycle. When you need to clean the appliance, you can use the reverse cleaning system designed exclusively by IG INGLAM, which can be activated in just three steps.

1st Step: Press Cool Air Button and don't let go

2nd Step: Power on this hair dryer then wait for 5 seconds

3th Step: It will stop automatically after cleaning running for 15 seconds, and then press any button to resume normal operation.

A well kept and maintained hair dryer lasts much longer than one that is not taken care of.

CAUTION - While it is operating, never obstruct the air inlet or outlet opening and do not place appliance on any surface.

|  | <p>IMPORTANT MESSAGE TO CONSUMERS THIS MESSAGE ABOUT GROUND FAULT CIRCUIT INTERRUPTERS CAN SAVE A LIFE</p> |  |
| <p>IF YOU MUST USE YOUR HAIR DRYER IN THE BATHROOM, INSTALL A GFCI* NOW!</p> | | |
| <p><small>Your local electrician can help you decide which type is best for you: a portable unit that plugs into the electrical outlet or a permanent unit installed by your electrician. The National Electrical Code now requires a GFCI in the bathroom, garages and outdoor outlets of all new homes. WHY DO YOU NEED A GFCI? Electricity and water don't mix. If your hair dryer falls in water while it's plugged in, the electric shock can kill you... even if the switch is "off". A regular fuse or circuit breaker won't protect you under these circumstances. A GFCI offers you far greater protection.</small></p> | | |
| <p>A GFCI CAN SAVE YOUR LIFE! COMPARED TO THAT, THE PRICE IS SMALL! DON'T WAIT... INSTALL ONE NOW!</p> | | |
| <p><small>*GFCI (Ground Fault Circuit Interrupter) is a sensitive device which reacts immediately to a small electric current leak by stopping the electricity flow.</small></p> | | |
