

Getting the Most from Your Grout Pen

1

DRY TIP: All new Grout Pens have a dry white tip until activated. On disposable paper, press/depress the tip repeatedly until the tip is saturated. You may need to press the tip 20 times or more to fully activate the pen.

2

FLIP TIPS: Tips are designed to be removable, when a tip becomes worn or damaged take it out and flip it over. If the tip falls out do not worry, simply put it back in and keep working.

3

TOO HARD: When applying Grout Pen, pressing too hard will damage the tip as grout lines are rough. It's better to fully prime the pen, then lightly move the pen across the grout line. Best practice is to make multiple light passes along the grout line instead of one heavy stroke.

4

GROUT LINE SIZE: Use the Narrow Tip Pen for grout lines approx 5mm. For wider grout lines use the Wide Tip Pen.

5

COLORS: Actual color may vary from the on-screen representation. To confirm color choice, please view a physical color chip/card/sample using the paint codes below.
