MINI-LED ULED 4K

The Award-winning Hisense U8 Series Mini-LED TV just got even better. With Peak Brightness 1500 and more than double the local dimming zones as last year, along with Quantum Dot Color, Dolby Vision HDR, and Low Reflection panel technology, the U8 delivers unmatched brightness, contrast and detail. And, with Dolby Atmos and an upgraded 50w 2.1.2 multi-channel audio system, the U8 creates an immersive cinema experience in your home. In addition, the U8 is compatible with the new Wifi 6E router protocol and includes a NEXTGEN TV ATSC 3.0 tuner making the U8 virtually future-proof. With the Google TV OS and Hands-Free Voice Control, searching for and playing all your favorite content is simple and seamless. Just say "Hey Google". The U8 also got more upgrades for the gaming enthusiast including a 144Hz VRR panel, Dolby Vision Gaming and FreeSync Premium Pro for an enhanced gaming experience. And, better also just got bigger with the U8H now available in an 85" screen size.

The entertainment you love. With a little help from Google. Google TV brings together movies, shows, live TV and more from across your apps and subscriptions and organizes them just for you. Discover new things to watch with recommendations based on what you watch and what interests you, from across your subscriptions and content available to you. Ask Google to find movies and shows, answer questions, control smart home devices, and more, with your voice. And with the Google TV app you can watch anywhere, anytime.

4K ULED™
Hisense's proprietary ULED technologies boost color, contrast, brightness, and motion. This suite of patented hardware and software technologies delivers an engaging and completely unique picture that can only be delivered by Hisense.

Mini-LED with Hi-View Local Dimming
Mini-LED is the latest breakthrough in backlighting technology. By utilizing LED's that are significantly smaller than traditional LED's we are able to use many more LED's to create a bright image that distributes the light more evenly for a uniform image across the screen. In addition, because of the large number of Mini LED's, we are able to employ advanced Hi-View local dimming technology to precisely adjust the LED's brightness in both dark and bright areas of the picture creating greatly improved contrast and producing an unmatched viewing experience in all room environments.

Quantum Dot Wide Color Gamut
Quantum Dot produces purer, richer, more brilliant and accurate color than a regular LED TV. Creating over a billion color combinations that bring vibrant images to life in a way non-QLED TVs can't.

Dolby Vision® • Dolby Atmos®
Dolby Vision HDR * picture and Dolby Atmos sound are cinema technology for your home. They provide amazing realism you can see and hear in every scene.

2.1.2 Multi-Channel Audio
With 50W of total power driving 5 speakers including rear 'overhead' speakers and a built-in subwoofer the U8 sounds as good as it looks

Metal Stand, Bezel-less design
A bezel-less design gives this television a sleek aesthetic that won't 'overpower' the room with an unnecessarily large frame. The metal stand provides sturdy support for this feature-packed television.

FilmMaker Mode
By disabling all post-processing (e.g. motion smoothing) and preserving the correct aspect ratios, colors and frame rates, Filmmaker Mode enables your TV to display the movie or television show's content precisely as it was intended by the filmmaker.

Smooth Motion and 144Hz Native refresh rate
Smooth Motion removes the digital 'noise' that can affect moving objects. The TV's native 144Hz refresh rate is the foundation for its 480 motion rate. These technologies work in concert to make fast-action scenes to ensure moving objects have minimal blurring.

144Hz Game Mode Pro
All the most advanced gaming tech, all in this TV. HDMI 2.1 inputs recognize gaming sequences to automatically adjust settings for smooth, uninterrupted play. The automatic low-latency mode (ALLM), 144Hz variable refresh rate (VRR) and FreesSync Premium Pro minimize input lag, screen jitter, and frame tearing.

Dolby Vision Gaming
This television can support Dolby Vision for gaming at 4k 144Hz.

Voice Remote
The voice remote control makes controlling your TV easier. Open apps, turn the volume up or down, search for your favourite shows. And if the actual remote goes missing, use the buttons on the TV to activate 'Find My Remote'.

Hands Free Voice Control
Put down the remote. Change the channel, find the latest movie, stream your favourite video and more with your voice. The quicker, easier way to find whatever you want to watch.

Google Assistant
The Google Assistant* is built into Google TV. Tell it to turn on the lights, change the thermostat, add stuff to your grocery list, or just play that video of your friend falling over for the millionth time. And with universal search, you can even get recommendations with Google TV.

Works with Alexa
This television works with Alexa through any of your Alexa-enabled devices. Just ask Alexa to switch the TV on or off, change channels and lots more.

Bluetooth® Connectivity
Wirelessly connect Bluetooth-compatible soundbars, headphones or stereo components to your TV. This quick and convenient connection eliminates unwanted and unsightly cords while providing a secure connection to your audio source.

*Google Assistant-compatible products required to use voice commands

*HDR viewing experience will vary by model, content availability and internet connection.
