

INSTANT FIRM[®]_x

TEMPORARY FACE TIGHTENER

BEFORE

IMMEDIATELY AFTER*

*Temporary effect. Individual results may vary.

How to use Peter Thomas Roth Instant FIRMx[®] Temporary Face Tightener:

- (1) Start by cleansing with a non-oily cleanser. Avoid using serum or moisturizer if possible. If you prefer to use serum or moisturizer, allow the products to fully absorb and dry.
- (2) Shake the tube and squeeze out a dime-size amount on the top of the hand.
- (3) Using fingertips or a clean, dry makeup brush, pick up a tiny amount of the product and apply onto completely dry skin for best results.
- (4) Using upward strokes, spread a thin layer of the gel onto forehead creases, fine lines along the temple area, nasolabial folds and enlarged pores.

(5) Let the product dry for approximately 5 minutes while remaining expressionless. Do not squint or smile.

(6) If you notice any white residue, moisten a cloth, cotton swab or fingertips and remove excess by gently patting the edges.

(7) Once the product is completely dry, you are good to go! You can gently pat on makeup, such as foundation or powder. To prolong the effects of Instant FIRMx[®], avoid water-based makeup. For external use only.
