1. All battery life claims are approximate and based on the median user tested across a mixed use profile (which includes both usage and standby time) under optimal network conditions. Actual battery performance will vary and depends on many factors including signal strength, network and device settings, temperature, battery condition, and usage patterns. 2. Water-repellent design creates a barrier to help protect against moderate exposure to water, such as accidental spills, splashes or light rain. Not designed to be submerged in water, or exposed to pressurized water, or other liquids; may diminish over time. Not waterproof. 3. Auto smile capture can recognize up to 5 faces/people in the same frame. 4. Available user storage is less due to many factors, including operating system, software and functions utilizing part of this capacity; may change with software updates. Check with your carrier or retailer for availability. 5. NFC-supported payment terminal and app required. Requires fingerprint authorization for purchase.
