What is the difference between THX Spatial Audio on the Razer Nari Ultimate and the immersive 7.1 channel virtual surround sound paired with the Razer ManO'War and True 7.1 Surround Sound Gaming with Razer Tiamat 7.1 v2?

THX Spatial goes beyond traditional virtual sound. With integrated content, THX Spatial Audio breaks the boundaries of defined 5.1 and 7.1 channel surround to deliver seamless 360° positional audio for more natural and lifelike positioning. It also adds depth to the experience by simulating sound both above and beneath you.

The 7.1 channel Virtual Surround sound utilized on the Razer ManO'War uses a more traditional technology that Razer uses to simulate 7 channels with only 2 physical speakers (1 driver on each ear cup). Meanwhile, Razer Tiamat 7.1 and Razer 7.1 V2 utilizes True 7.1 Surround where there are 5 drivers on each ear cup, the same as a home theatre system with physical surround speakers.

How do I clean my Razer Nari Ultimate headset?

We cannot say with certainty what type of dirt and debris may be on your product, or how certain cleaning products may react with it, but we have had good luck cleaning Razer products using commonly available monitor cleaning wipes.

- To clean the body of your Razer headset, gently wipe it with a monitor wipe.
- Do not scrub the surface of your Razer headset.
- When cleaning the earpads, make sure that the earcup and speaker don't get wet, as this can cause damage to your headset.
