

Center Cam 1.0 Owner's Manual

Quick Start Guide

1. Thread USB connector through holes in clip, then feed USB cord through until you reach flex-tube.

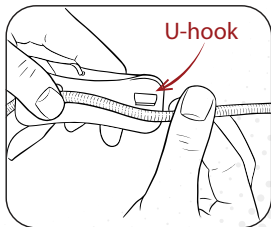

Quick Start Guide

2. Press USB connector flex- tube into clip hook till it "clicks".

TIPS:

- 1- you want the camera to end up approximately in the middle of the screen
- 2- You only need to click the flex tube into the front U-hook. If you need less tension, or for curved-back monitors, click into both U-hooks, and press clip into place.

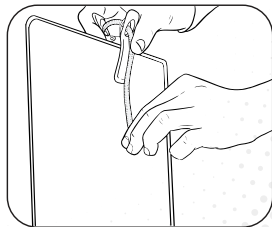

Quick Start Guide

3. Clip your Center Cam to your monitor and plug in your USB connector.

TIPS:

To occupy less screen space, you do not have to seat the clip down to the hinge-point.

Quick Start Guide

4. Once plugged in, remove lens cap.
5. Open web-conference app of choice. In the "Settings" menu, choose "video", and then CC HD Webcam (Center Cam). If CC HD Webcam doesn't appear, restart your computer and repeat.
6. In the advanced settings menu, choose "HD" or the highest quality output the web-conference app will allow. The camera is 1080p HD, however many/most web-conference apps don't allow this quality unless manually enabled.

Quick Start Guide

TIPS

1. Center Cam performs well in a variety of lighting scenarios, however Center Cam won't perform optimally in direct sunlight, back-light, white light and no light. We recommend warm, indirect light.
2. Move the web-conference window to make adjustments to eye-contact.
3. Center Cam is programmed to operate in a "top down" orientation, but can be used in "bottom up" orientation using after-market software and changing orientation 180.

Quick Start Guide

TIPS

4. Center Cam comes with a 65degree horizontal field of view lens, but can accommodate other lenses, a 52hfov, or an 80hfov, available for purchase on our website for a more narrow/wider angle.

5. Access getting started video tutorials on our website www.thecentercam.com
