GAOMON PD1161 Pen Display Installation

--Windows & Mac

For Windows User

1. All the cable are connected well.

2. Close all art programs and anti-virus program first.
Make sure there is no anti-virus program running here.(You can still run anti-virus program while the issue get confirmed and fixed)

3. Please uninstall the previous GAOMON driver clearly first.
Go to Control Panel---Programs and Features---uninstall current GAOMON Driver--also make sure **no other brands tablet driver. (VERY IMPORTANT)**.
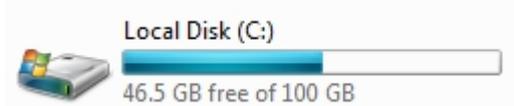

4.Download driver here: https://gaomon.net/

（1）Please right-click the driver setup icon, whose file extension is '.exe', in the installation file and select 'Run as administrator' from the dropdown list.

(Run as an administrator before installation , not after installation.)

(2) Tips! Please don't change the installation path. The default is C: drive.

Any suggestions and questions, please feel free to tell us. You can find us from ► 【GAOMON SUPPORT TEAM：https://www.gaomon.net/after-sales/】.

For Mac User

1. Download driver here: https://gaomon.net/

-- Click the installation package ----Drag 'GaomonTablet ' icon upon 'Applications' and **hold on** for a while until it enters in 'Applications' folder---- Double click 'GaomonTablet' and select 'Open' to run the driver.

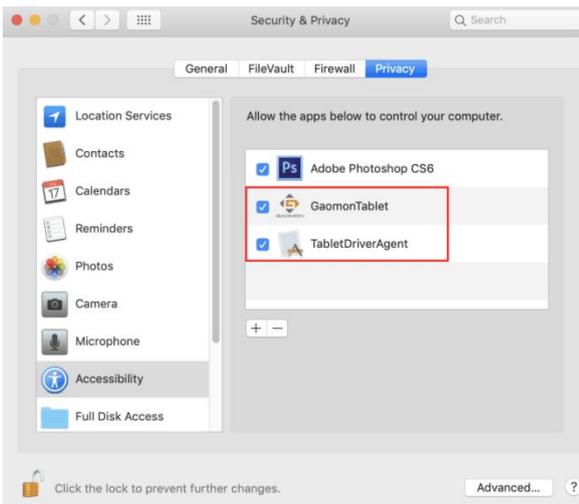

Here is the end of installing the driver completely.

If OS version are **mac 10.14 , 10.15, and mac Big sur** , please kindly remember to add the driver to the 'whitelist' to ensure that the tablet works normally.   If it is below mac10.14, please skip the following 4 steps.
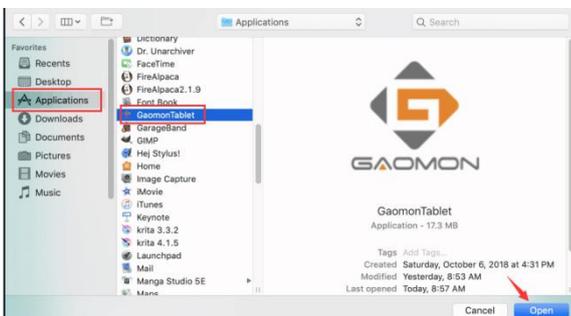

2. After installation, press one of the tablet express key and it will pop out a box   'Accessibility Access' . Then click 'Open System Preferences' to bring out 'Security & Privacy' box.   Don't click "Deny"!

3. Click the lock icon 🔒 and input your password-->Tick 'TabletDriverAgent'--> Click '十' and it will bring out another box.

4. Go Applications--> find out 'GaomonTablet' and click 'Open'

5. Tick 'GaomonTablet' circled in red and click the lock icon. Then we can draw freely on the tablet.
