Step 3D

Turn on the TV and switch the source to the HDMI input that the receiver is connected to.

Step 4A

Plug the smaller end of the power supply into the 5VDC port on the back of the receiver.

Step 4B

Plug the larger end of the power supply into a power outlet.

Step 4C

Make sure the power light on the receiver is solid green.

Step 4D

Wait for a bit as the receiver connects to the transmitter. The LINK light should be solid green once they’re connected.

A. How MyWirelessTV Works

MyWirelessTV allows video and audio to be sent from video source to the TV wirelessly. Therefore, you have the freedom to place the TV virtually anywhere within the home and enjoy live TV without the wiring mess.

Identify which source device you want to connect to the transmitter. Video from that source device will then be transmitted to your receiver box(es).

Installation for the MyWirelessTV is easy. Both units come pre-paired to work with each other. All you need to do is connect the cables according to the diagram or, if you want, follow the detailed step-by-step instructions.

Note: Only use power adapter by Actiontec Electronics Inc., model number WA-10P05FU.

B. Setting up Transmitter and Receiver

Step 1A

Select the source device (i.e. a cable/satellite set-top box or Blu-ray player) you wish to transmit signal to the TV, and power off that device. Get the wireless HD video transmitter unit from MyWirelessTV 2 Kit and follow the steps below.

Note: If the transmitter and receiver are in the same room, you may skip to Step 1C.

Step 1B (Optional)

If the source device is previously connected to an HDTV, unplug the HDMI cable from the back of the source, then plug the free end of the HDMI cable into the HDMI port labeled Out-to-TV on the back of the transmitter.

Source Device

Do NOT place the MyWirelessTV Transmitter or Receiver near a heat-generating source.

CAUTION

Step 1C

Plug the other end of the HDMI cable into the HDMI port on the source device.

Step 1D

Plug the other end of the HDMI cable into the HDMI port on the back of the transmitter.

Step 2A

Get the power supply from the MyWirelessTV 2 Kit. Plug the smaller end of the power supply into the 5VDC port on the back of the transmitter.

Step 2B

Plug the larger end of the power supply into a power outlet.

Step 2C

Verify the POWER light on the transmitter is solid green.

Step 2D

Now power on your video source device.

Note: The LINK light will blink.

Step 3A

Get the wireless HD video receiver, HDMI cable and power supply. Go to the TV you want to connect.

Step 3B

Plug one end of this HDMI cable into an HDMI port on the HDTV.

Step 3C

Plug the other end of the HDMI cable into the HDMI port labeled Out-to-TV on the back of the receiver.

Step 3D

Connect the TV to the transmitter; wire the power supply (Info 3.15) to the receiver.

Step 3E

Plug the larger end of the power supply into the 5VDC port on the back of the receiver.

Step 4C

When the power light on the receiver is in a solid green.

Step 4D

Wait a bit as the power supply connects to the transmitter. The LINK light should be on and each green color be connected.

How MyWirelessTV Works

Setting Up Transmitter and Receiver

Step 5A
Get the IR blaster cable from MyWirelessTV 2 kit. The IR blaster cable has a black connector.

Step 5B
Plug the IR blaster cable's black connector into the Transmit port on the MyWirelessTV 2 transmitter.

Step 5C
Plug the IR receiver extension cable to the IR blaster cable and attach the IR receiver extension cable to the IR blaster head.

Step 5D
Plug the IR extender cable to the front corner of the HDTV bezel or frame.

Step 5E
Locate the infrared (IR) sensor on your TV and the connection from the IR blaster head to the front of the TV. Use double stick tape to attach the IR blaster head to the TV, and the sensor is mounted directly on top of the IR blaster head. The sensor window should not be obstructed. The IR blaster cable is connected to the MyWirelessTV 2 transmitter and is sent to your TV. The video quality is poor and sometimes there's no video display on the receiver's TV.

Troubleshooting

FREQUENTLY ASKED QUESTIONS

How do I control the video source (e.g. cable/DirecTV box) remotely?

No. This step is optional.

I’m not seeing video on the TV that’s connected to the receiver.

Check the power and connection from receiver to the TV, and make sure the correct source input is selected on the TV.

If the receiver and transmitter are in the same room, setting up IR blaster is not required.

Remove the adhesive tape from the bottom of the IR blaster head.

The IR blaster cable connects to your wireless HD video transmitter.

This Quick Start Guide will walk you through the easy steps to set up the MyWirelessTV 2.
