## Setting Up Alexa Virtual Assistant

Locate the Alexa app on your smartwatch using one of the below three ways, then follow the set up prompts.

1. Open the Amazon Alexa app on your Fossil smartwatch and press **next** to get started. Allow Amazon Alexa permissions to manage phone calls and location.
2. To ensure your Alexa app is up to date, open the Amazon Alexa app on your phone. Navigate to **more** in the bottom right corner and click on **add device**.
3. Scroll down to select **smartwatch**, then select your Fossil smartwatch and click "Connect your Fossil Watch to Alexa."
4. For easy access, customize the preferred hardware button in the Amazon Alexa app on your Fossil smartwatch.
5. Your set up is complete! Open the Alexa app on your smartwatch and access Alexa by tapping on the watch or press the hardware button you customized.

\*Available in select markets.

\*\*Android phone must be connected to Bluetooth. Alexa voice assistant will not work if you are out of Bluetooth range, or if you leave your phone behind.
