  - Ⓐ keep the house lighting off and use device before sleeping.
  - Ⓑ Turn off all strong lighting for 10-20 minutes.
  - Ⓒ keep the production the dark place while working.
  - Ⓒ Suggested suspension height: keep the product hanged at a height of 1.2 m at a distance of 0.3 m from the wall.

## OUTDOOR

POOL/PATIO

25 FEET

SOURCE OF INSECTS

## ATTENTION

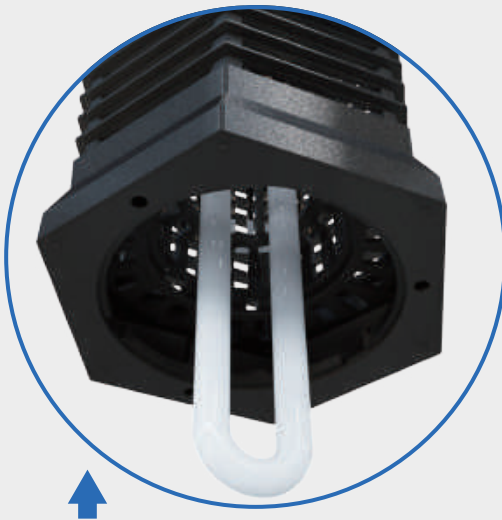

- ⦿ Hang the bug zapper at a height of 6 to 8 feet above the ground.
- ⦿ Place the device 25 feet away from the area intended for human activity.
- ⦿ Position the bug zapper between the source of insects (woods, lowlands, etc ) and the area to be protected.
- ⦿ Plug into a compatible extension cord signed for outdoor use, the device will emit a bluish glow within a few seconds.
- ⦿ To increase the killing rate, please clean insects debris stuck in the grid. please keep the power off, then open the base and use the metal bar with insulation to discharge the net, finally use soft brush to clean it.

### 4. BULB REPLACEMENT

- ⦿ Disconnect the device from the electric source.
- ⦿ Open the lamp by twisting the bottom tray in accordance with the arrows on it.
- ⦿ Use a screwdriver to remove the screw that holds the plastic gate.

## HOW TO CHANGE THE BULB

- Now the bulb can be pulled out of its socket.
- Insert the replacement bulb into the socket.
- Mount all parts back.

Notice: *Ultraviolet or "black light" is invisible to the eye, and its ability to attract insects diminishes over time. Therefore, although the bulb appears to be functioning, it should be replaced every season to maintain optimal "black light" efficiency.*

**CAUTION: UNPLUG UNIT BEFORE SERVICING**

<b>Problem</b>	<b>Possible Cause</b>	<b>Correction</b>
A. The light is off and there is no high voltage on the grid.	<ol style="list-style-type: none"> <li>1. There is no electricity.</li> <li>2. The lamp is not installed correctly.</li> <li>3. The starter is faulty.</li> <li>4. The burnt out bulb.</li> </ol>	<ol style="list-style-type: none"> <li>1. Check fuse or circuit breaker. Check extension cord.</li> <li>2. Check all sockets for proper fit and alignment.</li> <li>3. Starter replacement by manufacturer is required.</li> <li>4. Replace the light bulb.</li> </ol>
B. The light is on, but there is no high voltage on the grid.	<ol style="list-style-type: none"> <li>1. Shorted grids.</li> <li>2. The transformer is defective.</li> </ol>	<ol style="list-style-type: none"> <li>1. Examine the grid and clean it using an air blower.</li> <li>2. Replacement by manufacturer is required.</li> </ol>
C. Intermittent or continuous sparking between grid rods.	<ol style="list-style-type: none"> <li>1. The gap between grid rods is too small.</li> <li>2. The grid is clogged with foreign material.</li> </ol>	<ol style="list-style-type: none"> <li>1. Unplug the unit and adjust grids by bending them back into alignment.</li> <li>2. Clean the grid using an air blower.</li> </ol>
D. The light is on, but no longer attract insects.	<ol style="list-style-type: none"> <li>1. The invisible power of black light is reduced due to the age of the lamp.</li> </ol>	<ol style="list-style-type: none"> <li>1. Replace the bulb. See bulb replacement section in the user manual.</li> </ol>
