

PRO 88W-R35

VHF Wireless Lavalier Microphone System

The PRO 88W-R35 wireless lavalier microphone system comprises the PRO 88W/R receiver and the PRO 88W/T transmitter as used in the other PRO 88W systems, plus an ATR35mW omnidirectional condenser lavalier microphone.

The operating instructions in the enclosed manual for the PRO 88W apply to the new PRO 88W-R35 system as well. Please note that the PRO 88W-R35 system is available on a single frequency pair.

The ATR35mW is a high-quality miniature condenser microphone. The omnidirectional pickup pattern of the microphone makes it inherently resistant to wind and clothing noise, while providing accurate frequency response.

A microphone clothing clip and windscreen are included.
