

Quick Reference Guide

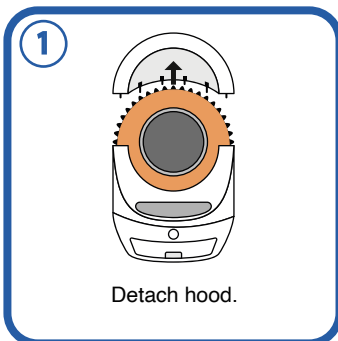

Leo's Loo Too

Smarty Pear

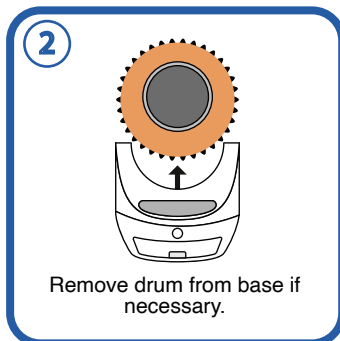

Drum May Have Shifted

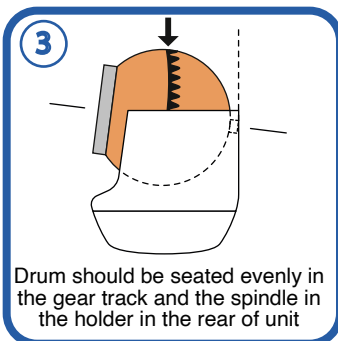

The drum may have shifted during shipping. To make sure it is seated properly before set up, please lift the cover off to inspect. Drum should be seated evenly in the gear track and the spindle in the holder in the rear of unit.

Detach hood.

Remove drum from base if necessary.

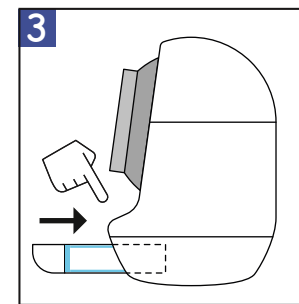

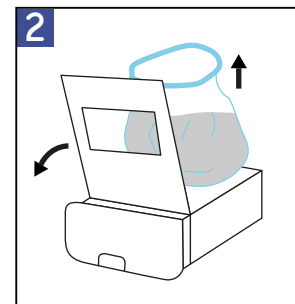

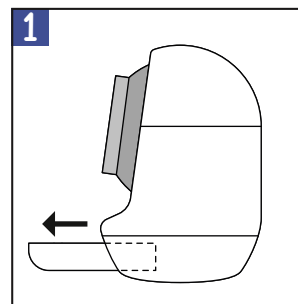

Drum should be seated evenly in the gear track and the spindle in the holder in the rear of unit

Replace cover then begin setup using your Quick Start Guide included.

Emptying the Waste Drawer

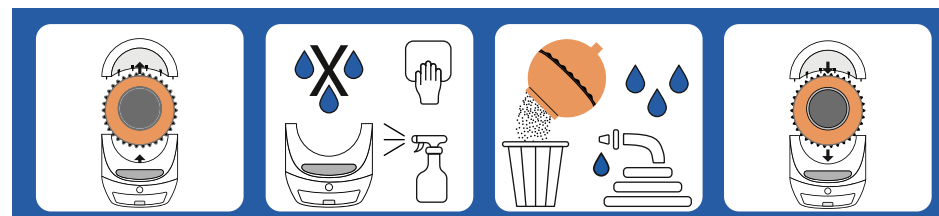

When the waste drawer is full, the POWER button light will turn red and blink slowly. The machine will stop rotating.

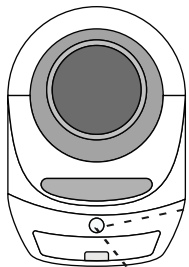

- 1 Press the POWER button for 2 seconds to power off, then pull out the drawer.
- 2 Remove and replace the waste drawer liner bag and top off litter in the drum.
- 3 Reinsert drawer and short press the POWER button for 2 seconds to restart.

Cleaning Your Loo

- 1 Detach hood and then remove the drum from the base.
- 2 Vacuum base and wipe with cleaning solution and cloth. Do NOT use water on the base as it will damage electronics.
- 3 Empty old litter from drum and then wash out with soap and water. Let dry thoroughly.
- 4 Return drum to unit, install cover and fill with fresh clay clumping litter.

POWER Button

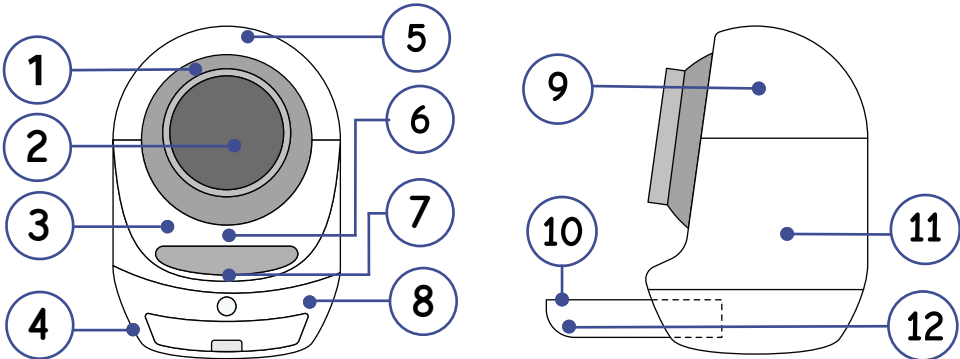

Button Operation

- On/Off: Press 2 Seconds (1 Beep)
- Pairing: Press 5 Seconds (3 Beeps)
- Run/Pause: Short Press
- Changing Modes: Double Press

Carbon Filters

Kitty Wellness

1 UV Rays that Eliminate 99.9% of Bacteria

Leo's Loo Too utilizes UV rays to kill bacteria. After your cat exits the Loo, the machine projects UV rays into the waste drawer to thoroughly sterilize. The UV rays are 99.9% effective at eliminating bacteria, parasites and viruses.

2 Triple Safety Protection

RADAR WALL

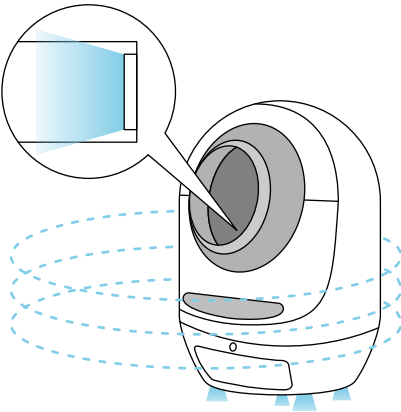

Our state of the art radar system forms an invisible wall around your Loo. When it detects your kitty nearby, it stops the Loo from rotating, ensuring your kitty can always enter safely.

WEIGHT SENSORS

Four weight sensors located at the bottom of your Loo detect when your kitty enters and exits the drum. The Loo will only initiate a cleaning cycle when the weight sensors indicate the drum is empty.

ANTI-PINCH SENSOR

An anti-pinch sensor located at the top of the waste drawer detects when foreign objects enter the waste chute. When foreign objects are detected, your Loo will stop immediately and reverse rotation.

3 Anti-Chew Cord

Leo's Loo Too operates at low voltage (12 V) and features an anti-chew electrical cord to keep your kitty safe from electrical shocks.

Product Specifications

Product Name	Automatic Self-Cleaning Litter Machine
Dimensions	22 x 24 x 27.6 in (56 x 61 x 70 cm)
Input Voltage	12 V
Max Weight Capacity	55 lb (25 kg)
Max Litter Capacity	1.5 gal (6 L)
Material	PP
Product Weight - Net	27.5 lb (12.5 kg)
Product Weight - Gross	37.4 lb (17 kg)
Power - Operating	53 kWh per year
Power - Standby	9 kWh per year
Scale Accuracy	± 1 lb (0.5 kg)
