

Installation

Install Instruction

(2) How the Timer Works

Turn on the light, click the "timer" button to switch the indicator light color cyclically:

Blue Light On: Work for 3 Hours

Green Light On: Work for 9 Hours

Red Light On: Work for 12 Hours

For Example: Set the green light at 8:00 am, the growth light will work for 9 hours from 8:00 am to 17:00 pm, then goes out, and continue to work from 8:00 am to 17:00 pm every day.

Tips:

You can run it on your smart plug to control times better. Just connect the lamp to a smart plug, turn on the light and set the colors and brightness, then you will get a customized timer.

(3) Suggestions on Using the Timer

① **Seedling/
Vegetative Stage**

Suggested Lighting Cycle:
12 hours/day.

② **Flowering/
Fruit Stage**

Suggested Lighting Cycle:
6-9 hour/day.

③ **Full-Grown Stage**
