PWIRBBQ299

Smart Bluetooth BBQ Grill Thermometer

Digital Display, Wireless Remote Alert

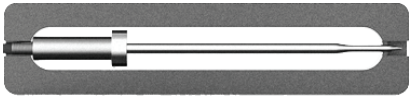

iOS Android Phone

User Manual

Get to know the device

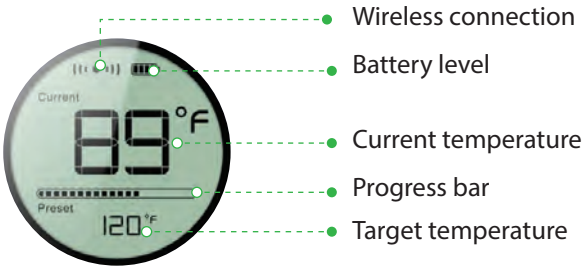

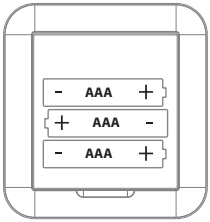

The device provides 6 sockets for probes.
Which enable you to monitor 6 items at once, if you need more probes besides these 2 probes in the standard package, please contact dealer.

AAA Battery*3

Put in the battery

Three **AAA** size batteries are needed for this device.
Make sure they are put in the right direction by following the icons on the unit.

Install the probes

The device will keep scanning the sockets when its power is switched on, the Probe Indicators will blink one by one from 1 to 6 where probes are plugged in.

Then insert the probes into the food, make sure the front tip of the probe is in the center of the food to get accurate temperature.

Download the APP

Search the keyword "**Grill5.0**" in Appstore or Google Play, or scan the following QR code with your phone. Download and install it for free.

Make sure your phone meet the requirements:
iPhone 4S, and later models; iPod touch 5th, ipad 3rd generations and later models, all ipad mini;
Android devices running version 5.0 or later, with wireless BT 4.0 module.

Grill Thermometer

Get it on Google play

Available on the App Store

The 'Grill 5.0' App:

- View Your Temperature History Timeline
- Displays Real-Time Temperature
- Unique 'Target Temperature' Setting

- Alarm & Alert Notifications
- Free to Download
- Available for iPhone & Android

Power ON/OFF

Press and hold the power button on the device for 3 seconds to power it on. The LCD display will show "**ON**' with a beep sound. Press and hold the power button to power **OFF**.

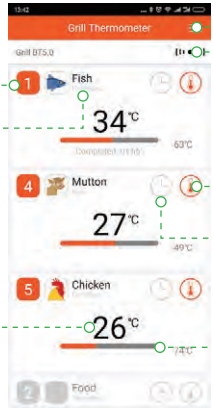

If there are no probes installed and it is not paired to a smart device, it will power off automatically.

Pair with your phone

1. Switch on your device and keep the wireless BT switch of your phone to **ON**. Launch the app, and follow the instructions in the app to pair and activate the device.
2. Connected successfully.
3. If you can't connect, try restarting the device and phone.

Enjoy your barbecue time

Choose the food type and preference for the food where each probe is inserted, the app and the device will display its current and target temperature.
When the food is ready, the app and the device will alarm.
