

# Gazillion

TONS & TONS OF BUBBLE FUN!

## HURRICANE

### OPERATING INSTRUCTIONS

1. Install 6 AA (LR6) batteries (not included) and replace the battery door. (Diagram 1)  
Note, Alkaline batteries for best performance.
2. Open the Gazillion Bubbles solution bottle and pour the solution into the reservoir. (Diagram 2)  
Caution: Do Not Overfill The Reservoir As This May Cause The Solution to Spill!
3. Flip the switch on the back to turn on or off the machine. (Diagram 3)
4. Wands will begin to spin and bubbles will begin to flow from the Hurricane. (Diagram 4)

Note: Make sure battery compartment area is dry before installing new batteries. Solution, or any liquid in battery compartment, can cause damage to the item.

### CLEANING

1. In order to keep your bubble toy working properly, be sure to clean the bubble wands and reservoir with warm water after every use.
2. Pull out the reservoir to open up the bubble machine. (Diagram 5)
3. Empty all solution from the reservoir. (Diagram 6)
4. Rinse wand and reservoir with warm water. (Diagram 7)

Diagram 7

### PRECAUTIONS

DO NOT immerse the machine into water.

### TROUBLE SHOOTING

Problem	Action
1. The Bubble Hurricane is not turning on.	- Make sure that batteries are properly installed and the cover is replaced correctly. Or install new batteries.
2. The Bubble Hurricane machine is running but it is not blowing bubbles.	- Clean the machine as in the cleaning instructions

### IMPORTANT NOTES:

1. For best results, only fill with Gazillion Bubble solution.
2. Bubble solution may spill and create a slippery surface. All care should be taken to avoid such situations.
3. Please retain these instructions for future use.
