

Super Flip

Straws are not suitable for a child under 6 months.

For your child's safety and health

WARNING!

- Continuous and prolonged sucking of fluids will cause tooth decay.
- Always check food temperature before feeding.
- Throw away at the first signs of damage or weakness.
- Keep components not in use out of the reach of children.
- Never attach to cords, ribbons, laces or loose parts of clothing. The child can be strangled.
- Never use feeding teats as a soother.
- Always use this product with adult supervision.

Accidents have occurred when babies have been left alone with drinking equipment due to the baby falling or if the product has disassembled. Tooth decay in young children can occur even when non-sweetened fluids are used. This can occur if a baby is allowed to use this type of beaker for long periods through the day and particularly through the night, when saliva flow is reduced or if it is used as a soother. Take extra care when microwave heating; localised over heating can occur. Always mix the heated food and check the temperature before feeding.

CLEANING AND STERILISATION: Before first use, disassemble and clean the product and then place the components in boiling water for 5 min. This is to ensure hygiene. Before each subsequent use clean carefully to ensure hygiene. Wash in warm soapy water and rinse in clean water or use a dishwasher (top shelf only). Do not clean with solvents or harsh chemicals. Do not allow product to come into contact with oil based foods (e.g. oil/tomato based sauces) as staining will occur. Suitable for all forms of sterilisation.

STORAGE AND USE: INSPECT BEFORE AND AFTER EACH USE AND PULL THE SPOUT IN ALL DIRECTIONS. Do not store or leave in direct sunlight or near a source of heat. Do not store with or allow to come into contact with solvents or harsh chemicals. Not suitable for use in a conventional oven or a combination microwave oven with the grill feature switched on. Do not leave the spout in direct sunlight or heat or leave in disinfectant "sterilising solution" for more than recommended as this may weaken the teat. If the product has a soft silicone spout FOR SAFETY AND HYGIENE REASONS IT IS RECOMMENDED THAT THE SPOUT IS REPLACED EVERY 2 MONTHS. Microwave safe. Not suitable for fizzy (carbonated) drinks. Complies with EN14350.
